Mr. Martin stated that all available County housing units are currently occupied.
- Custodial Agreements:  
Mr. Martin's update noted that staff has not had time to work on the custodial agreements because the staff has been working on the legislative grants awarded

**Project Review:**

**Recommended Unlisted Actions:**

- A. Proposed Acquisition of Land by Suffolk County for Open Space Preservation Purposes known as the Sutera Property, located in the Mud Creek County Park area, Town of Brookhaven

Lauretta Fischer, Principal Environmental Analyst, Suffolk County Department of Economic Development and Planning, gave a presentation regarding the acquisition of a 0.115± acre parcel which is part of a larger assemblage of land along Mud Creek in East Patchogue. Ms. Fisher noted that to date the County has acquired almost 130 acres of the 160 acre Mud Creek assemblage. Ms. Fischer also noted that the County is in the process of working on a comprehensive analysis of the Mud Creek watershed that includes the remediation of the Gallo Duck Farm which was acquired by the County through a tax lean process.

Mr. Kaufman made a motion to recommend classification of the proposed project as an Unlisted Action with a Negative Declaration. Mr. Swanson seconded the motion. Motion Carried.

- B. Proposed Improvements to County Road 73, Roanoke Avenue, from State Route 25, Main Street to the Vicinity of County Road 58, Old Country Road, (CP#5562) Town of Riverhead.

Erik Bergey, Senior Civil Engineer, Suffolk County Department of Public Works, gave a presentation regarding the proposed project. It was noted that the project involves the full reconstruction of curbs and sidewalks, necessary drainage improvements, and asphalt resurfacing and/or full-depth reconstruction as pavement condition warrants. The project also includes the installation of permeable concrete gutters, new leaching basins, and hydrodynamic stormwater treatment systems.

Mr. Kaufman made a motion to recommend classification of the proposed project as an Unlisted Action with a Negative Declaration. The motion included that all necessary permits and approvals will be obtained from New York State Department of Conservation. The motion also included that to the greatest extent possible any trees removed will be replaced with wire friendly and sidewalk friendly trees and if possible said replacement trees will be placed on private property with permission from the landowner. Ms. Growney seconded the motion. Motion Carried.

- C. Proposed Rehabilitation of County Road 13, Crooked Hill Road, from County Road 7, Wicks Road, to County Road 106, Campus Road, Brentwood, (CP#5538) Town of Islip.

Christopher Poelker, Junior Civil Engineer, Suffolk County Department of Public Works, gave a presentation regarding rehabilitation of County Road 13 which will address the pavement, sidewalk, and drainage deficiencies in the corridor. This will be done by installing a positive drainage system, expansion of two existing recharge basins, full depth pavement patching, resurfacing, the replacement of curb, sidewalk, pavement markings and the necessary traffic signal modifications.

Mr. Bagg made a motion to recommend classification of the proposed project as an Unlisted Action with a Negative Declaration. The motion also included that to the greatest extent possible any trees removed will be replaced with wire friendly and sidewalk friendly trees and if possible said replacement trees will be placed on private property with permission from the landowner. Ms. Spencer seconded the motion. Motion Carried.

### **Recommended Type II Actions:**

- A. Proposed Construction of check-in station at Cedar Point County Park, (CP#7009) Town of East Hampton.

John Corral, Planner, Suffolk County Department of Economic Development and Planning, described the three Suffolk County Department of Parks, Recreation and Conservation projects. The projects involve the construction of new check-in stations at three County Parks. Mr. Corral presented this information because Nick Gibbons, Principal Environmental Analyst, Suffolk County Department of Parks, Recreation and Conservation, was not able to attend the meeting.

The Cedar Point County Park project involves the construction of a new park check-in station. The existing check-in station will be demolished.

Mr. Kaufman made a motion that the project be classified as a Type II action pursuant to Title 6 NYCRR Part 617.5(c)(2)(7)(20)(27). Ms. Growney seconded the motion. Motion Carried.

- B. Proposed Construction of check-in station at Indian Island County Park, (CP#7009) Town of Riverhead.

The Indian Island County Park project involves the construction of a new park check-in station. The existing check-in station will be repurposed as a Park Ranger station for law enforcement use.

Ms. Growney made a motion that the project be classified as a Type II action pursuant to Title 6 NYCRR Part 617.5(c)(7)(20)(27). Mr. Kaufman seconded the motion. Motion Carried.

- C. Proposed Construction of check-in station at Montauk County Park, (CP#7009) Town of East Hampton.

The Montauk County Park project involves the construction of a new park check-in station. The existing check-in station will be demolished.

Ms. Spencer made a motion that the project be classified as a Type II action pursuant to Title 6 NYCRR Part 617.5(c)(2)(7)(20)(27). Ms. Growney seconded the motion. Motion Carried.

### **Recommendations for LADS Report:**

- A. Recommendations for Legislative Resolutions Laid on the Table February 11, 2014

Mr. Corral noted that the staff's SEQRA recommendations are listed on the LADS report.

Mr. Kaufman asked if IR 1042-2014 "Establishing Guidelines for the Use of Methoprene in Suffolk County" was the same as the previous resolution on Methoprene that was reviewed by the CEQ. Mr. Corral noted that IR 1042-2014 was exactly the same as the previous resolution and as a result staff's recommendation for IR 1042-2014 is the same as the CEQ's previous recommendation. The CEQ requested that staff call the Legislative Counsel's office and notify the office of the CEQ's SEQRA recommendation for IR 1042-2014.

Mr. Kaufman also inquired as to whether IR 1091-2014 "To extend deadline for Tick and Vector-Borne Diseases Task Force" was the same as IR 1095-2014 "Creating a Tick Control Advisory Committee". Mr. Corral explained that IR 1091-2014 relates to a task force that was set up a few years ago and IR 1095-2014 relates to a new advisory committee.

Mr. Kaufman noted that he personally did not agree with IR 1048-2014 "Authorizing the Suffolk County's Law Enforcement Agencies to donate decommissioned body armored vests to local emergency service provides". Mr. Kaufman noted that he feels that in some cases the decommissioned body armored vests may no longer be as protective as originally intended. Mr. Kaufman abstained from voting on this resolution. Ms. Growney also abstained from voting on this resolution.

Mr. Bagg made a motion to accept staff recommendations as presented for the February 11, 2014 Legislative Resolutions. The motion was seconded by Ms. Spencer. Motion carried.

**Other Business:**

As a follow up to the January 15, 2014 CEQ discussion on IR 1002-2014 “Authorizing an agreement to revitalize Cedar Island Lighthouse”, Mr. Swanson asked Mr. Martin if Parks had discussed this resolution with Legislator Schneiderman. Mr. Martin informed the Council that Parks Commissioner Dawson spoke with Legislator Schneiderman and explained that there is an existing contract in place that allows for the ideas that this organization has for the restoration of the Lighthouse. Mr. Martin also noted the County Attorney’s office is working with Legislator Schneiderman to make sure his concerns are addressed.

Ms. Growney noted that the LIRR is using antifreeze on the train tracks and asked if this might represent an environmental concern. Ms. Russo noted that the type of antifreeze the LIRR uses is very benign and therefore does not represent an environmental concern.

Ms. Spencer requested that the next CEQ meeting, which is scheduled for March 19, 2014, be held at the Scully Estate in Islip. The Council agreed to have the meeting at the Scully Estate.

SUBJECT: Phase I Environmental Site Assessment Review  
Mud Creek  
Estate of Ida Sutera, a/k/a DeMann  
0200-973.60-03.00-013.000

---

Please be advised that we have reviewed the Phase I Environmental Site Assessment for the above referenced property transmitted by your office. The assessment prepared by Advanced Cleanup Technologies, Inc. is in compliance with the 11/25/08 Environmental Site Assessment Criteria required by the Suffolk County Department of Economic Development and Planning and Division of Real Estate. Based on the information within the assessment concerning the recent site survey, the review of existing EPA, NYSDEC and Suffolk County Department of Health Services' records in relation to toxic and hazardous waste sites, as well as the historical review of the site and its surrounding areas, it appears that the property in question does not contain recognized environmental conditions.

It is however recommended that the following issue be addressed prior to acquisition:

- 1) The Phase I Environmental Site Assessment noted an abandoned old truck, discarded metal railing, and a discarded lumber pile on the subject property. All of this material should be removed and properly disposed of prior to acquisition.

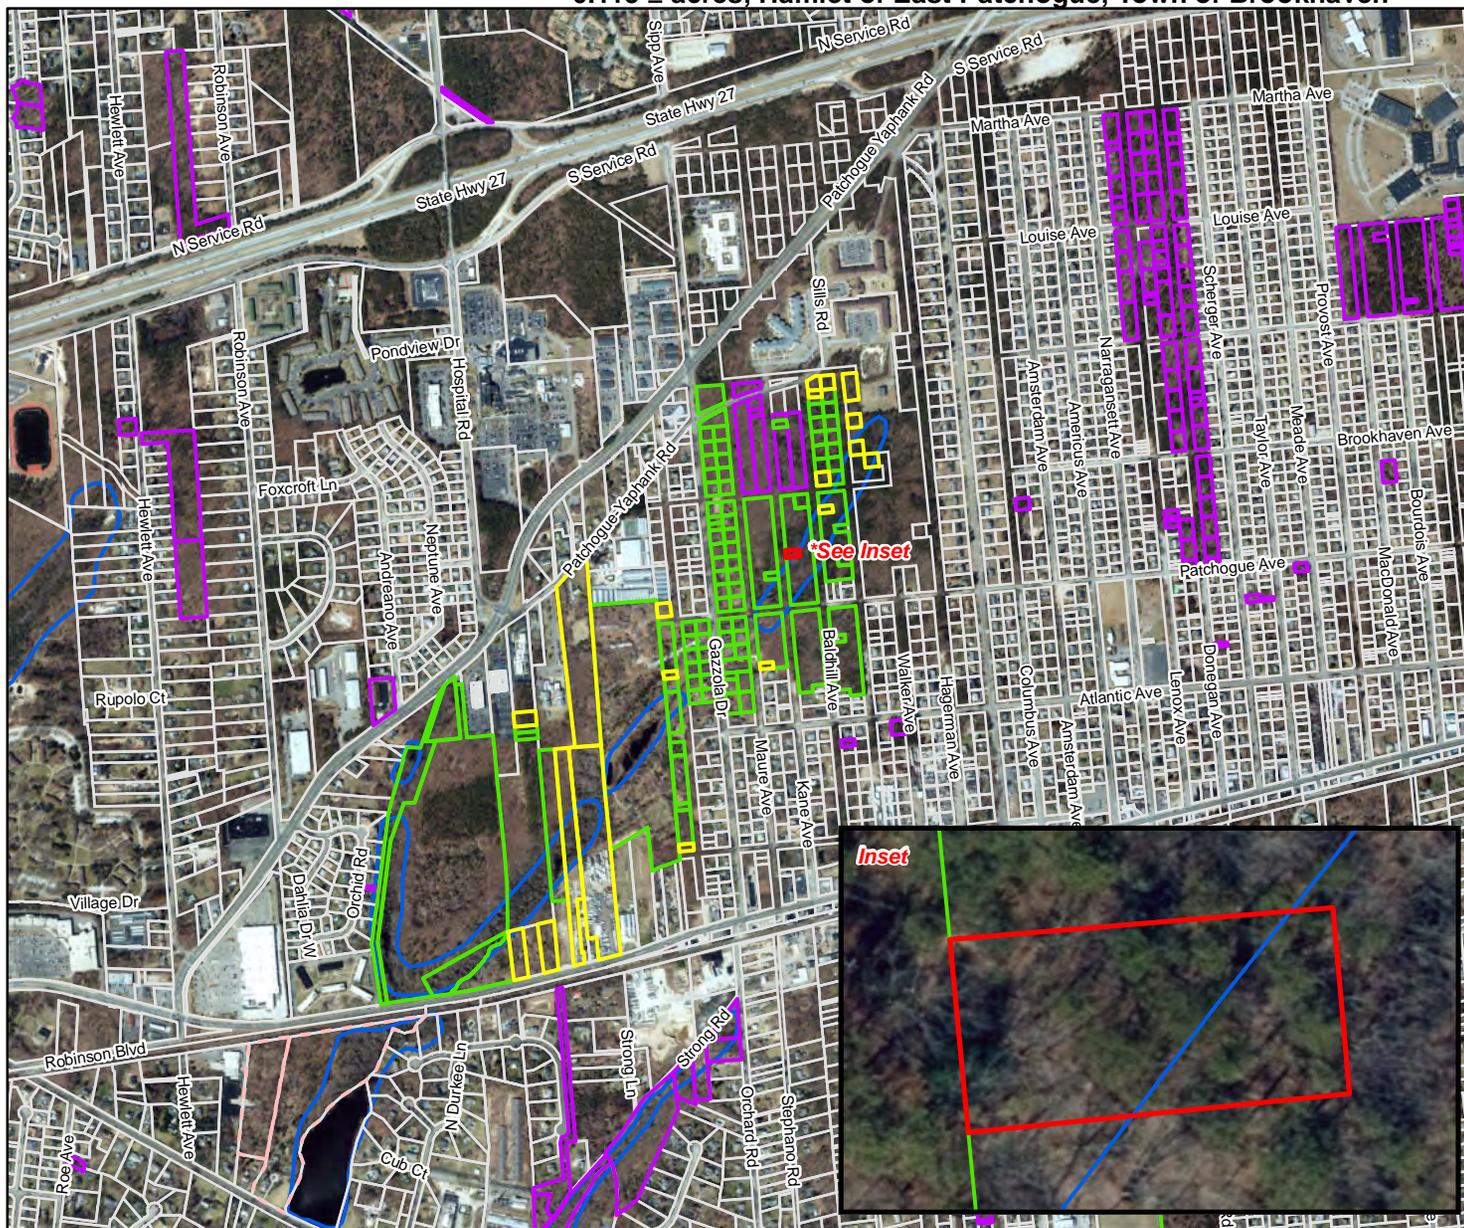

If the Planning Division can be of further help in this matter, please let us know.

### MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:20,000. Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service  
 Web Soil Survey URL: <http://websoilsurvey.nrcs.usda.gov>  
 Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Suffolk County, New York  
 Survey Area Data: Version 10, Dec 20, 2011

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Mar 28, 2011—May 12, 2011

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Dear Ms. Pietrusiak:

The Suffolk County Department of Public Works will be presenting a project proposal to the Suffolk County Council on Environmental Quality (CEQ). The CEQ requires the applicant to complete an Environmental Assessment Form (EAF) before they will consider the project. Included in this EAF are questions as to whether or not there are any threatened or endangered species of plant or animals located within the project limits.

The above-referenced project is situated in Suffolk County in the Town of Riverhead beginning at NYS Rte. 25, Main Street to County Road 58, Old Country Road (see attached map). In the proposal, the County is planning to reconstruct sidewalks and curbs, repair and replace storm sewer infrastructure where necessary and resurface the roadway, but will stay within the right-of-way. The County will replace vegetation and trees in the disturbed areas within the project limits.

If you have any questions, or need additional information concerning this matter, please feel free to contact either myself or Erik Bergey, P.E., Sr. Civil Engineer at 631-852-5377.

Very truly yours,

Brief Description of Proposed Action (include purpose or need/attach relevant design reports, plans, etc.): This portion of CR 13 was originally constructed during the late 1950's. The original drainage structures are deteriorating and require replacement and the associated frames, grates and castings are non standard and contributing to extensive flooding issues. The flooding issues are causing roadway failure and asphalt pavement delamination. This capital project will address the pavement and drainage deficiencies in the corridor. This will be done by installing a positive drainage system, expansion of two existing recharge basins, full depth pavement patching, resurfacing, the replacement of curb, sidewalk, pavement markings and the necessary traffic signal modifications.

**FULL ENVIRONMENTAL ASSESSMENT FORM**  
6 NYCRR Part 617  
State Environmental Quality Review

**Part 2 – Identification of Potential Project Impacts**

Instructions: Part 2 is to be completed by the lead agency. It is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency’s reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**YES**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**NO**” to a numbered question, move on to the next numbered section.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “**Moderate to large impact may occur.**”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action.”
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Identify portions of EAF completed for this project: Part 1  Part 2  Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information and considering both the magnitude and importance of each identified potential impact, it is the conclusion of \_\_\_\_\_ as lead agency that:

- A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.
- B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:
- There will, therefore, be no significant adverse impacts from the project as conditioned, and therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).
- C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. ## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:20,000. Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service  
Web Soil Survey URL: <http://websoilsurvey.nrcs.usda.gov>  
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Suffolk County, New York  
Survey Area Data: Version 11, Dec 15, 2013

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

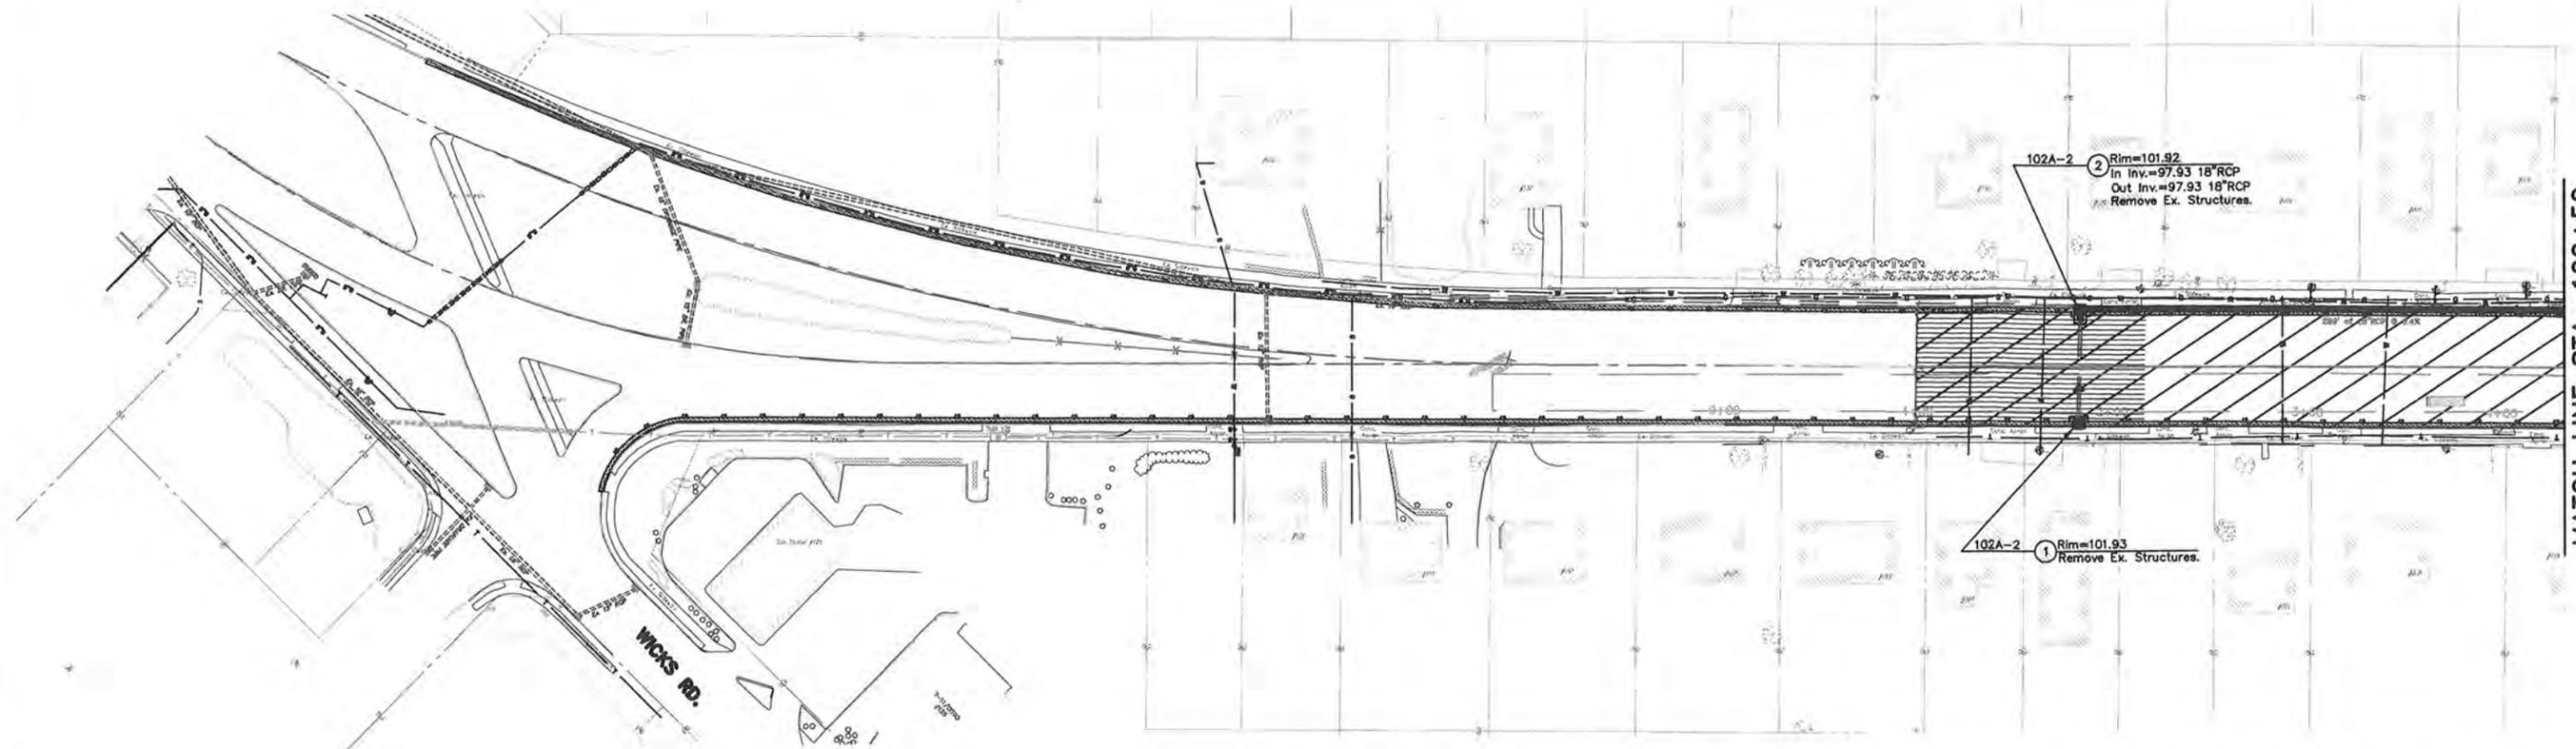

Date(s) aerial images were photographed: Data not available.

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

**RE: Rehabilitation of County Road 13, Crooked Hill Road, from County Road 7, Wicks Road, to  
County Road 106, Campus Road, Brentwood, Town of Islip, Capital Project No. 5538**

Dear Ms. Pietrusiak:

The Suffolk County Department of Public Works will be presenting a project proposal to the Suffolk County Council on Environmental Quality (CEQ). The CEQ requires the applicant to complete an Environmental Assessment Form (EAF) before they will consider the project. Included in this EAF are questions as to whether or not there are any threatened or endangered species of plant or animals located within the project limits.

The project referenced above is situated in Suffolk County in the Town of Islip, Hamlet of Brentwood (See attached map). The project site is located on County Road 13, Crooked Hill Road and extends between County Road 106, Campus Road and County Road 7, Wicks Road. In the proposal, Suffolk County is planning on rehabilitating the roadway by resurfacing the existing asphalt pavement, replacing the entire existing drainage system, expanding two existing stormwater detention basins, replacing the curb and sidewalk and installing a traffic signal. Enclosed you will find a copy of the USGS Quadrangle map showing the project location highlighted.

If you have any questions, or need additional information concerning this matter, you can contact either myself or Chris Poelker, Junior Civil Engineer at 631-852-4240.

Very truly yours,

William J. Colavito, P.E.

The Suffolk County Department of Public Works will be presenting a project proposal to the Suffolk County Council on Environmental Quality (CEQ). The CEQ requires the applicant to complete an Environmental Assessment Form (EAF) before they will consider the project. Re: Construction of check-in station at Cedar Point County Park, Town of East Hampton  
(CP#7009)

Dear Madam Chair:

Suffolk County Parks seeks to construct a new park check station at Cedar Point County Park, Town of East Hampton. This new station will more safely and efficiently serve both the public and park staff. The existing check station will be demolished. The proposed structure is approximately 1,700 square feet in size, and will be located in the center of the entrance drive. Plans of the proposed building are attached for your review.

I believe this to be a Type II action under SEQR Title 6 NYCRR Part 617.5 (c)(7), "construction or expansion of a primary or accessory/appurtenant, non-residential structure or facility involving less than 4,000 square feet of gross floor area and not involving a change in zoning or a use variance and consistent with local land use controls, but not radio communication or microwave transmission facilities;".

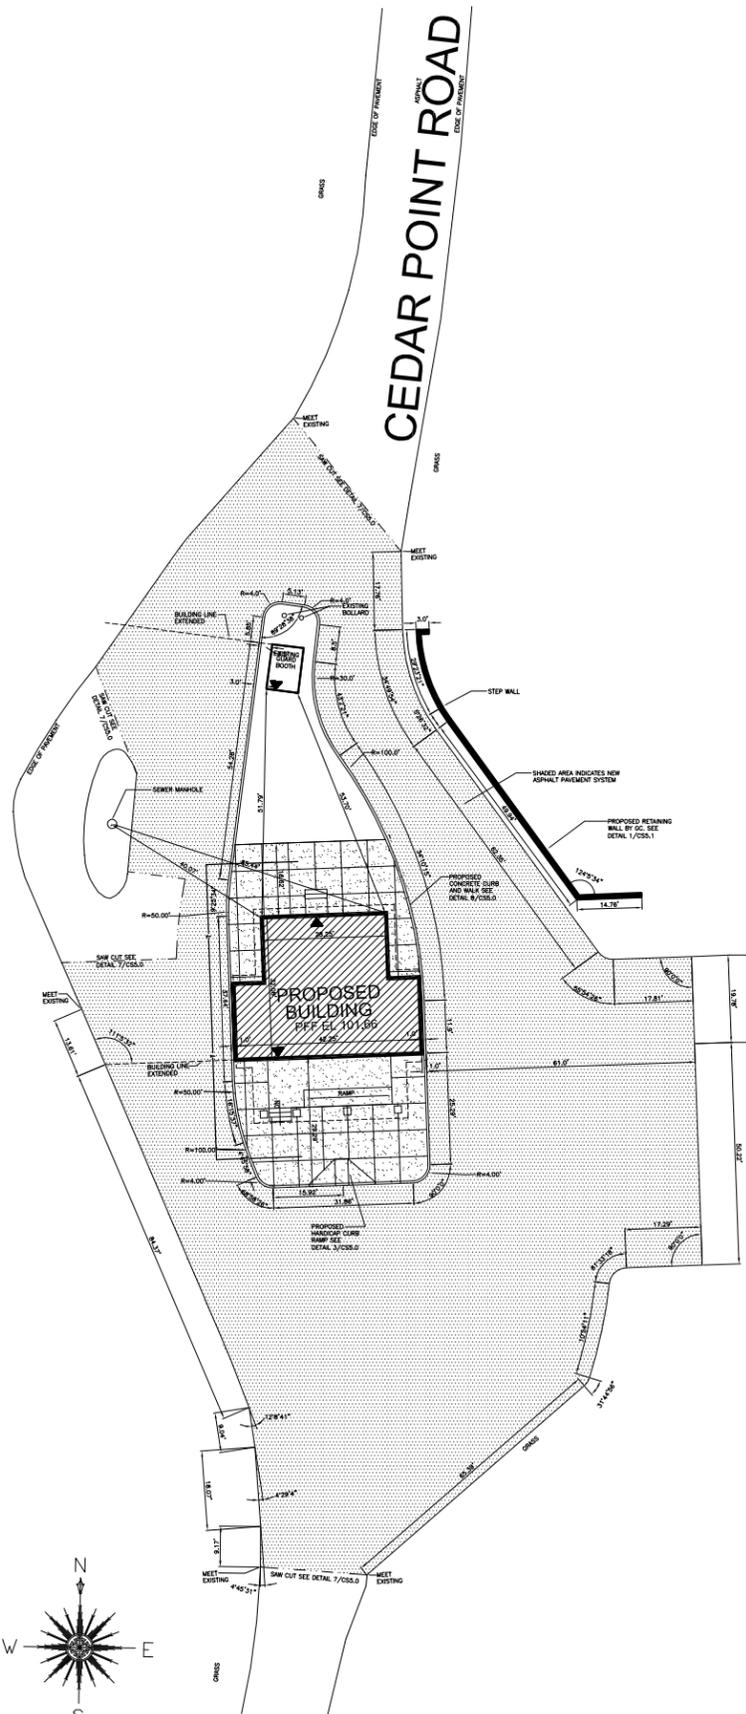

Please contact my office at 631-854-4600 if you have any questions regarding this project.

Sincerely,

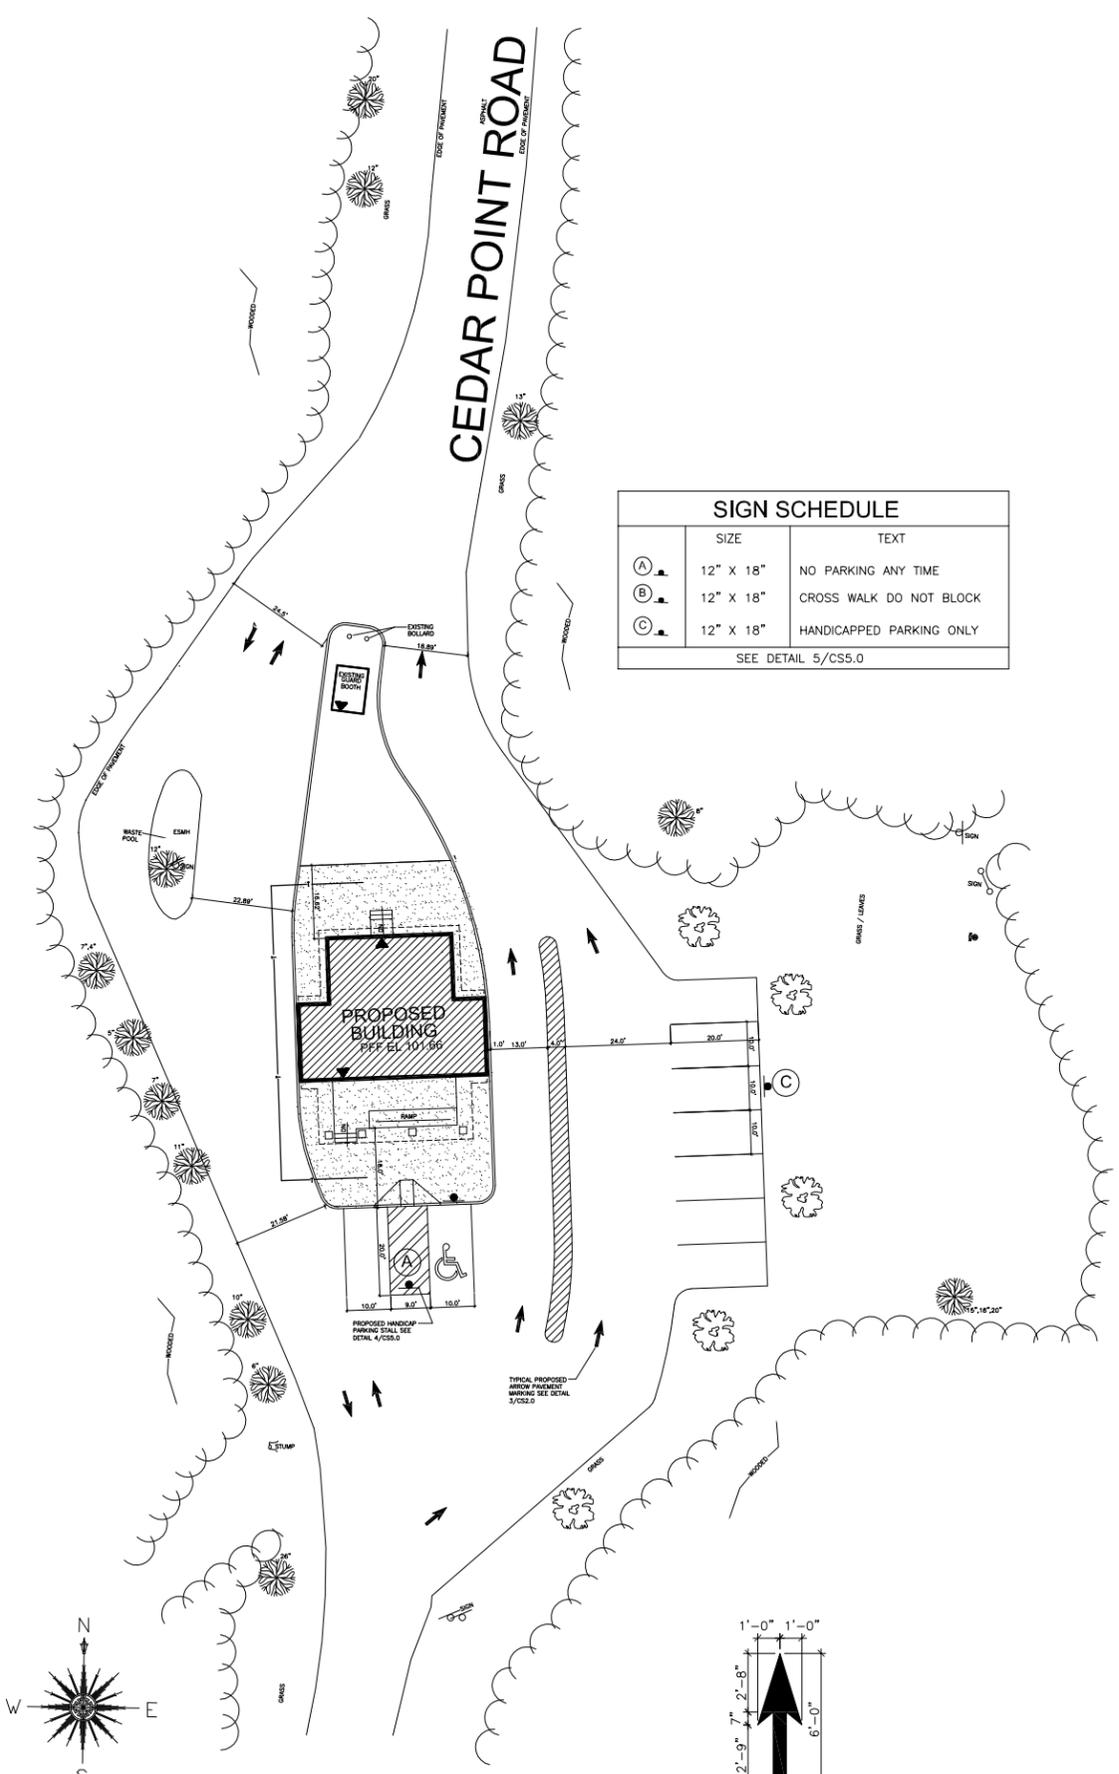

Nicholas Gibbons  
Environmental Analyst

Re: Construction of check-in station at Indian Island County Park, Town of Riverhead (CP#7009)

Dear Madam Chair:

Suffolk County Parks seeks to construct a new park check station at Indian Island County Park, Town of Riverhead. This new station will more safely and efficiently serve both the public and park staff. The existing check station will be repurposed as a ranger station for law enforcement. The proposed new structure is approximately 1,700 square feet in size, and will be located east of the existing structure. Plans of the proposed building are attached for your review.

I believe this to be a Type II action under SEQR Title 6 NYCRR Part 617.5 (c)(7), "construction or expansion of a primary or accessory/appurtenant, non-residential structure or facility involving less than 4,000 square feet of gross floor area and not involving a change in zoning or a use variance and consistent with local land use controls, but not radio communication or microwave transmission facilities;".

Re: Construction of check-in station at Montauk Island County Park, Town of East Hampton  
(CP#7009)

Dear Madam Chair:

Suffolk County Parks seeks to construct a new park check station at Montauk County Park, Town of East Hampton. This new station will more safely and efficiently serve both the public and park staff. The existing check station will be demolished. The proposed new structure is approximately 1,700 square feet in size, and will be located in the same location as the existing structure. Plans of the proposed building are attached for your review.

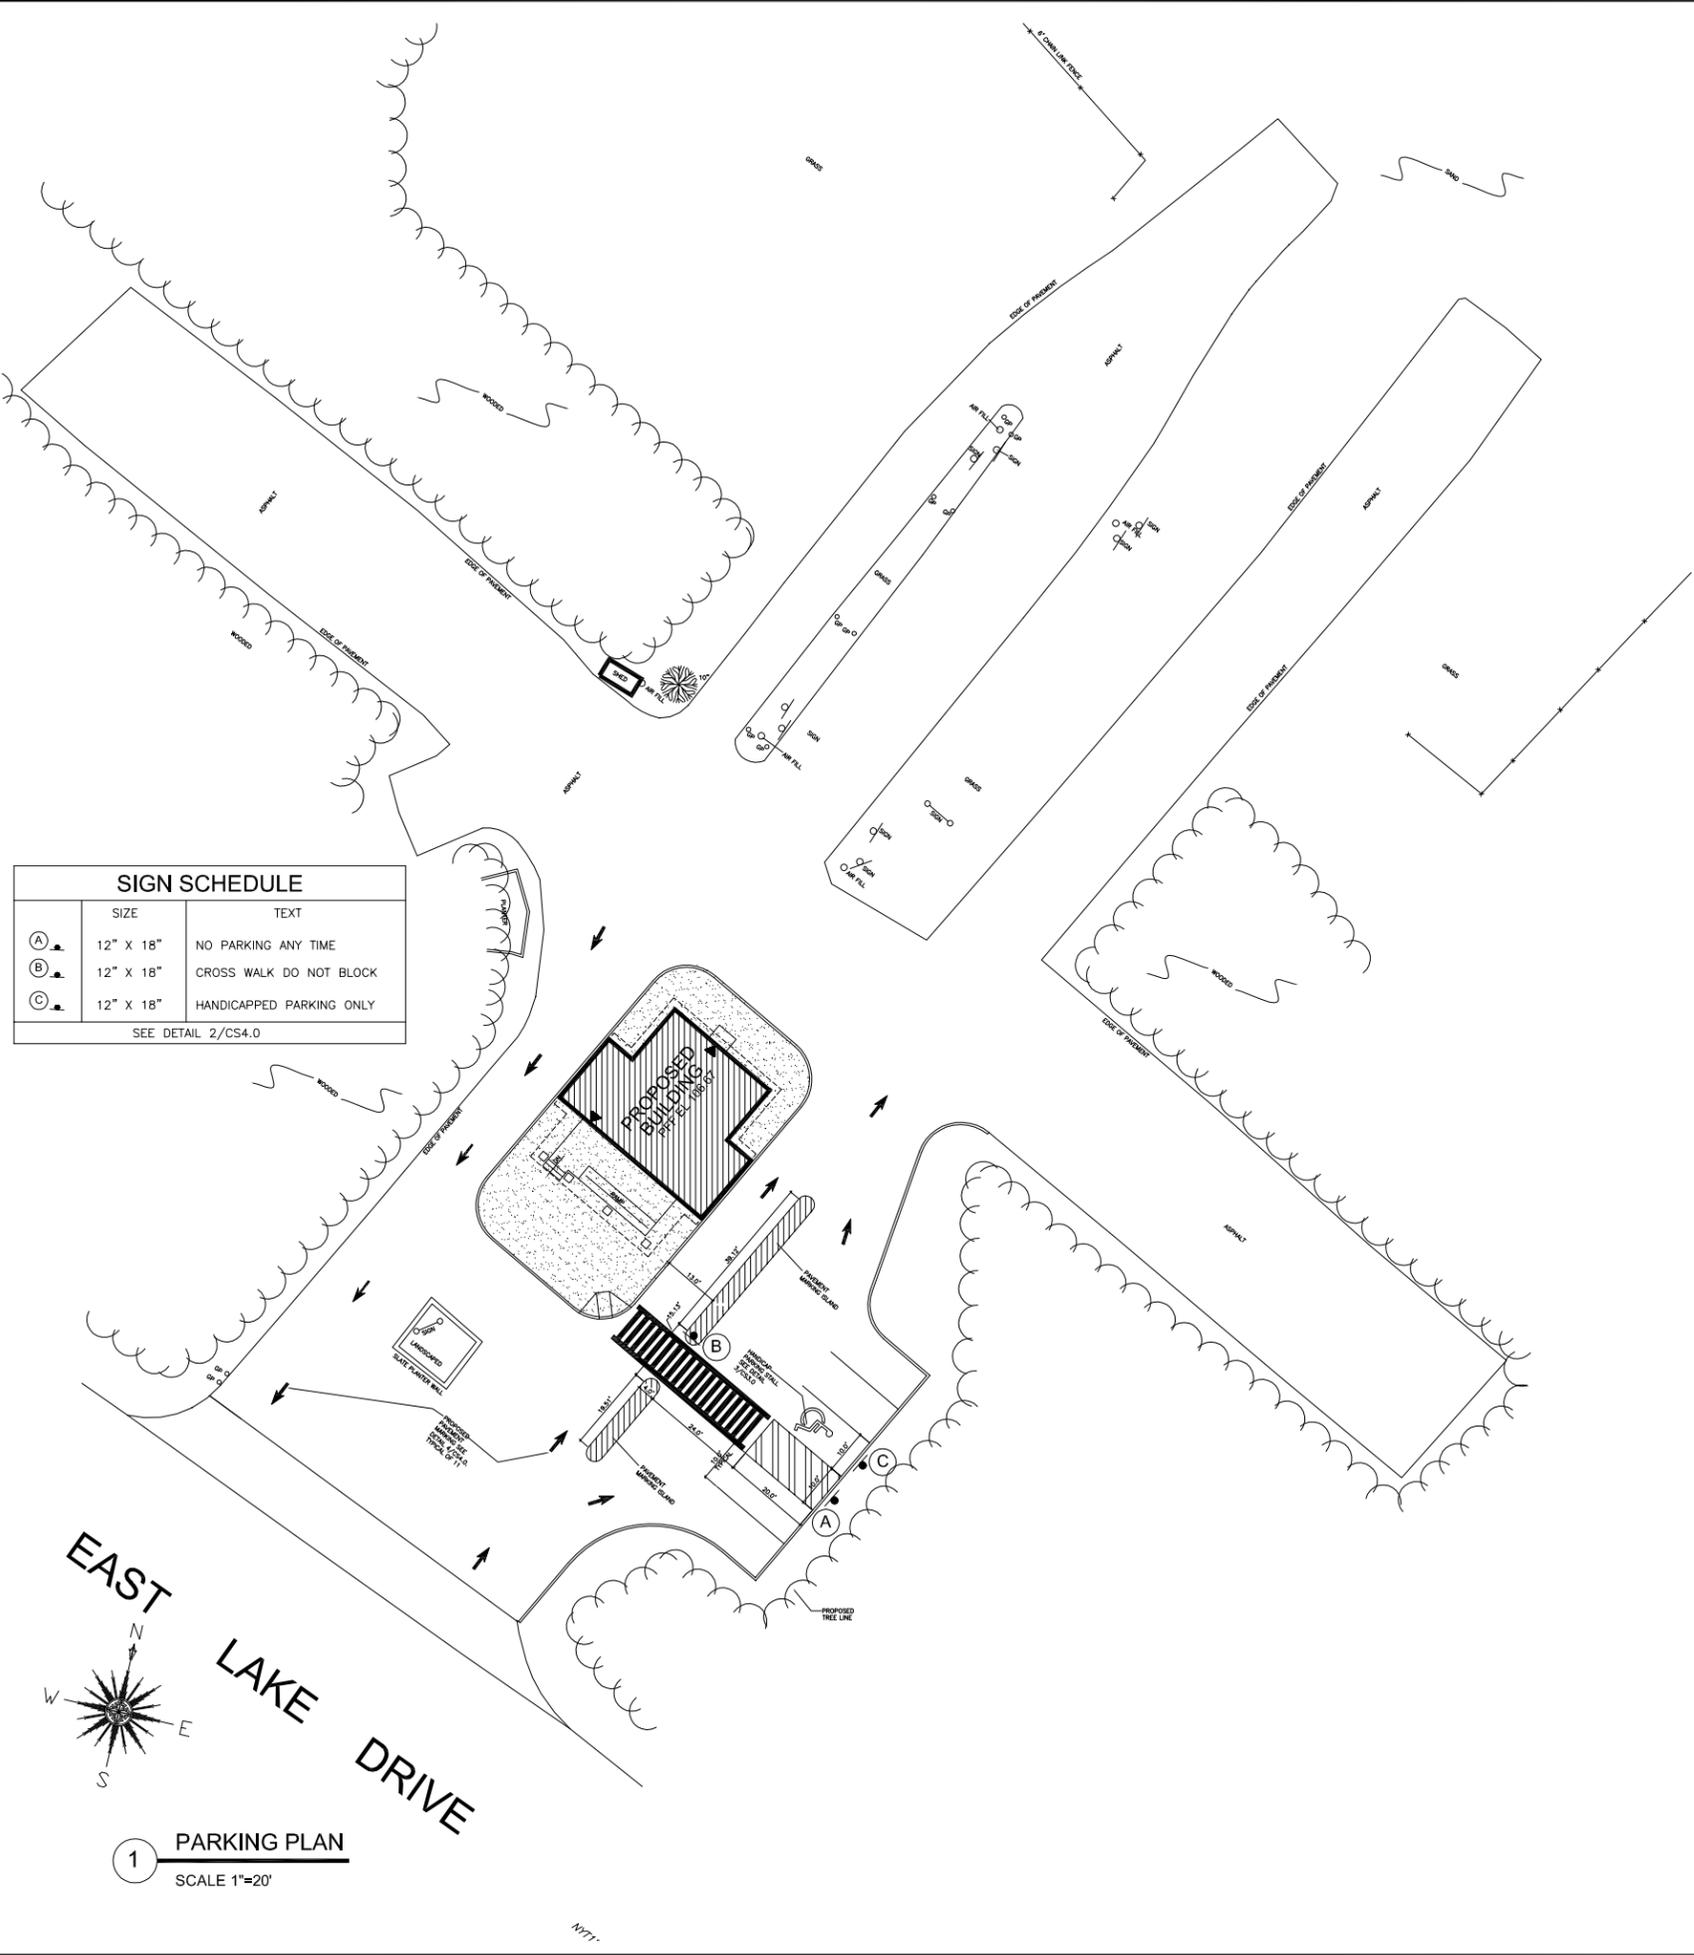

I believe this to be a Type II action under SEQR Title 6 NYCRR Part 617.5 (c)(7), "construction or expansion of a primary or accessory/appurtenant, non-residential structure or facility involving less than 4,000 square feet of gross floor area and not involving a change in zoning or a use variance and consistent with local land use controls, but not radio communication or microwave transmission facilities;".

Please contact my office at 631-854-4600 if you have any questions regarding this project.

Sincerely,

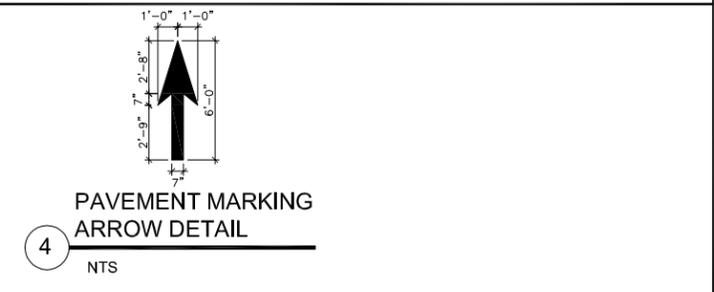

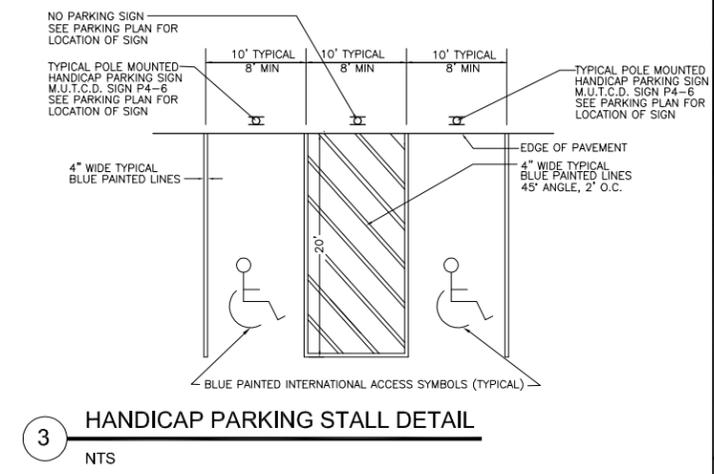

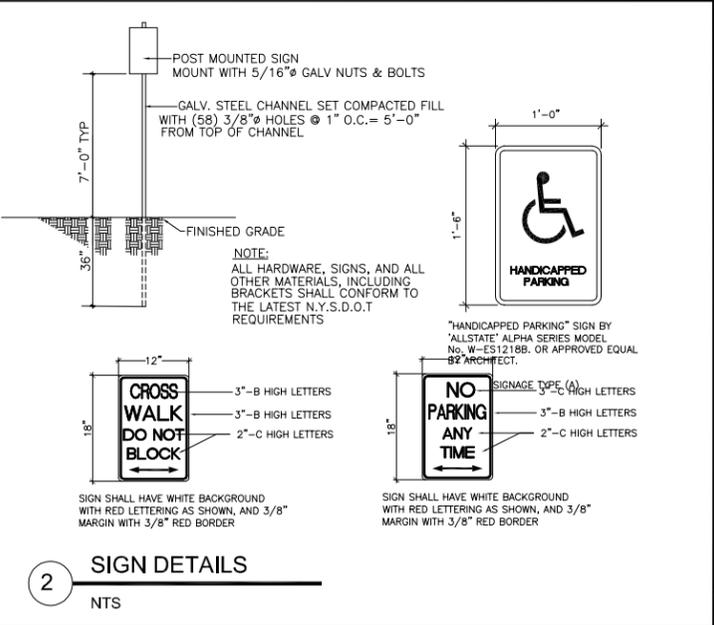

Nicholas Gibbons  
Environmental Analyst
