WHAT IS NARCAN?

Narcan is a drug that reverses the effects of heroin and other opiates.

WHY DOES THIS MATTER?

Suffolk County continues to battle an opiate and painkiller epidemic that has taken too many lives already. Within the first year that the county police carried Narcan, more than 50 lives were saved.

HOW CAN I HELP?

Come to this training session, which is open to anyone. You will be trained to react to an overdose and administer the drug that can save a life.

WHY NOT FLUSH Rx DRUGS IN TOILET?

Studies have shown Rx drugs are leaching from cesspools into our waterways.
