Project Review:

Recommended Unlisted Actions: (Taken Out of Order)

A. Proposed Acquisition of Land Under the New Suffolk County Drinking Water Protection Program – Open Space Component and the Old Suffolk County Drinking Water Protection Program – Brushes Creek Addition – for the Capital Asset Retirement Fund, LLC and Tristate Capital Holdings, LLC Property, Town of Southold.

Lauretta Fischer, Chief Environmental Analyst for the Suffolk County Department of Economic Development and Planning, Division of Planning and Environment, gave a presentation to the CEQ. The project involves the acquisition of 0.67 acre parcel, identified by Suffolk County Tax Map number 1000-127.00-08.00-017.002, to be dedicated to Suffolk County Parks in order to assure it remain in open space for passive recreational use. The 0.67 acre parcel is part of an assemblage of six parcels being acquired as part of the overall 25.87 acre Brushes Creek acquisition. The other five parcels are Master List parcels for which Suffolk County has previously issued a SEQRA Negative Declaration in connection with the parcels' future acquisition for open space purposes.

Mr. De Rubeis made a motion to recommend classification of the proposed project as an Unlisted Action with a Negative Declaration. The motion was seconded by Legislator Krupski. Motion carries.

Minutes:

The minutes for the October 19, 2016, CEQ were tabled until the December 14, 2016 CEQ meeting.

Historic Trust Docket:

Director's Report:

Mr. Martin updated the Council on the following:

Housing Program:

Mr. Martin noted that Suffolk County Parks is continuing to work on the interior renovations at Blydenburgh Cottage in Blydenburgh County Park. Once finished with the improvements the property will be reappraised for a new rental rate. Mr. Martin also noted that the tenant moved out of the property at 300 Old River Road in Manorville and Parks will be renovating this property before it is rented again to a new tenant in the early spring.

Custodial Agreements:

There were no new updates on the custodial agreements.

Mr. Martin informed the Council that the Big Duck lighting in Flanders will take place on November 30, 2016 at 7 p.m.. He reminded everyone that the Big Duck is owned by Suffolk County and is likely the most famous County landmark.

Project Review:

Recommendations for LADS Report:

Recommendations for Legislative Resolutions Laid on the Table November 9, 2016.

Mr. Corral noted that the staff's SEQRA recommendations are listed on the November 9, 2016 LADS reports. Mr. Corral also noted that CEQ staff has been working with the Suffolk County Department of Public Work on Introductory Resolution 1968-2016 which is for the rehabilitation of Guggenheim Lake. Mr. Corral explained that the Department of Public Works is working with the hired consultant to prepare an EAF for this project and that it will be submitted to the CEQ for their review. As a result, Mr. Corral noted that the recommendation on the LADS report next to IR 1968-2016 is to submit an EAF to CEQ for review.

Mr. Carpenter made a motion to accept staff recommendations for the November 9, 2016 Legislative Resolutions. The motion was seconded by Ms. Growney. Motion carried.

Project Review:

Recommended Type I Actions:

A. Proposed Adoption of Suffolk County Resolution, "Accepting the Comprehensive Master Plan for the Yaphank County Complex", Town of Brookhaven

Josh Slaughter Legislative Aide for Legislator Kate Browning gave a presentation regarding the Master Plan for the Yaphank County Complex. The proposed action involves the adoption of a Legislative Resolution to accept the Comprehensive Master Plan for the Yaphank County Complex which was prepared by the Yaphank County Center Planning Committee. The Comprehensive Master Plan for the Yaphank County Complex is a land use plan that was developed to provide a long term development guide for the Yaphank County Complex. The Comprehensive Master Plan for the Yaphank County Complex allows for the development of up to 30 to a maximum of 60 acres of the existing developable land (aprox. 197 acres) at the Yaphank County center for future County needs and the preservation of the remaining land. The Master Plan does not designate where the development areas should be located but does includes development guidelines to fulfill the goals of maintaining a "campus-style" design for the Yaphank County Complex, protecting the Complex's natural resources and protecting the character of the surrounding community.

As part of its project review the CEQ discussed the following topics in detail:

- O The feasibility of having solar energy production at the Yaphank County Complex. It was noted that there are possibilities for solar production at the Yaphank County Center. It was noted that solar is being considered for the County Jail roof. In addition, the Plan recommends that solar be considered on roofs and parking lots but does also allow for a maximum of 5 acres increments of solar development on the areas that have been designated for future County development use.
- Clarification that the Suffolk County Farm is not included in this Comprehensive Plan and the Plan's recommendations do not apply to the County Farm. The CEQ also requested that the acreage and references to the County Farm should be checked and clarified to accurately represent the historic nature of the Farm and the preservation protections that are currently in place. The CEQ also felt that the Plan's reference that the County Farm may have resulted in Nitrogen impacts to the groundwater should be removed because unlike the other groundwater plums referenced in the Plan which were based on the groundwater sampling and scientific analysis this reference was speculative in nature.

Ms. Kepert made a motion to recommend classification of the proposed project as a Type I Action with a Negative Declaration. The motion was seconded by Ms. Spencer. Motion carries. Mr. Kaufman abstained from the vote.

Other Business:

The CEQ discussed the upcoming public scoping sessions for the Subwatersheds Management Plan that are scheduled for November 29, 2016 in Hauppauge and December 1, 2016 in Riverhead. Mr. Kaufman, the CEQ Vice Chair, discussed the process and how the County has conducted public scoping sessions in the past. Mr. De Rubies provided some of the comments he had on the draft scope.

Public Portion: (Taken Out of Order)

Before the end of the CEQ meeting Mr. Gulizio with the Peconic Baykeeper organization commented on the testimony that was given yesterday at the Suffolk County Legislature's Environment, Planning and Agriculture (EPA) meeting. Mr. Gulizio noted that there was testimony at the EPA Committee meeting on the Ronkonkoma Hub sewer connection project by Chris Kent, the applicant's attorney, that noted that there were two Environmental Impact Statements (EIS) done, one for the Ronkonkoma Hub development project and one for the Bergen Point Sewage Treatment Plant expansion. Mr. Gulizio noted that this was incorrect and wanted to know if the CEQ had based their SEQRA recommendation to the Legislature on this information. Mr. Kaufman, Vice Chair of the CEQ, stated that he had also testified before the EPA committee yesterday regarding the Ronkonkoma Hub sewer connection Mr. Kaufman noted that there was an EIS done for the Ronkonkoma Hub Project and this EIS discussed two possibilities for wastewater treatment. The plan discussed the possibility of a constructed Sewage Treatment Plant located near the project in the Town of Islip and also discussed the possibility of a connection to the Bergen Point Sewage Treatment Plant. Mr. Kaufman noted that there had also been a SEORA review done for the Bergen Point Sewage Treatment Plant but there was not an Environmental Impact Statement done for that project. Kaufman also discussed the CEQ's recent review of the Ronkonkoma Hub sewer connection project. CEQ Staff also clarified what was discussed as part of the CEQ's SEQRA review for the Ronkonkoma Hub sewer connection project. Mr. Kaufman then noted that Mr. Guilizio's public comments have been heard by the CEO and that he may wish to also make these comments to the Town of Brookhaven and the Suffolk County Legislature.

Ms. Gloria Russo, Chairperson Council On Environmental Quality H. Lee Dennison Building - 11th Floor 100 Veterans Memorial Highway Hauppauge, New York 11788

Dear Ms. Russo:

Attached for your review and consideration is an Introductory Resolution authorizing the acquisition of land for open space preservation purposes known as the Brushes Creek Addition – Capital Asset Retirement Fund, LCL and Tristate Capital Holdings, LLC property in the Town of Southold. Please review the proposal and forward the Council's SEQRA recommendation to the County Executive and Legislature. Attached is a short EAF for your consideration.

Sincerely,

Sarah Lansdale Director of Planning

cc: Lauretta R. Fischer, Chief Environmental Analyst Andrew Freleng, Chief Planner John Corral, Senior Planner Melissa Kangas, Planning Aide RESOLUTION NO. -2016 **AUTHORIZING** THE ACQUISITION OF LAND UNDER THE NEW SUFFOLK COUNTY DRINKING WATER (EFFECTIVE **PROTECTION** PROGRAM DECEMBER 2007) OPEN SPACE COMPONENT AND THE OLD SUFFOLK COUNTY DRINKING WATER PROTECTION FOR PROGRAM [C12-5(D)] CAPITAL ASSET RETIREMENT FUND, LLC AND HOLDINGS. TRISTATE CAPITAL PROPERTY - BRUSHES CREEK (TOWN OF SOUTHOLD - SCTM#'S 1000-127.00-03.00-009.002 & 1000-127.00-08.00-017.002)

WHEREAS, Local Law No. 24-2007, "A Charter Law Extending and Accelerating the Suffolk County 1/4% Drinking Water Protection Program for Environmental Protection," Section C12-2(A)(1) authorized the use of 31.10 percent of sales and compensating tax proceeds generated each year for environmental protection, as determined by duly enacted Resolutions of the County of Suffolk; and

WHEREAS, adequate funding is provided for, pursuant to Section C12-2(A)(1) of the SUFFOLK COUNTY CHARTER, from 31.10 percent of the sales and compensating tax proceeds, for the acquisition of such land; and

WHEREAS, Article XII of the SUFFOLK COUNTY CHARTER established the Old Suffolk County Drinking Water Protection Program, as amended and effective as of November 30, 2000, the first priority of which being the acquisition of qualified lands to be funded by revenues generated by the quarter percent (1/4%) sales and compensating use tax; and

WHEREAS, in compliance with Sections C12-3(B) and (C) of the SUFFOLK COUNTY CHARTER, as amended and effective as of November 30, 2000, prior to the Division Director of the Division of Real Property Acquisition and Management entering into any negotiations for the acquisition of, and consummation of acquisition of any such parcel, the Board of Trustees of the Department of Parks, Recreation and Conservation shall review and recommend its acquisition; and

WHEREAS, adequate funding is provided for, under the Old Suffolk County Drinking Water Protection Program, pursuant to Section C12-5(D) of Article XII of the SUFFOLK COUNTY CHARTER, as amended and effective as of November 30, 2000, for the acquisition of such land; and

WHEREAS, Resolution No. 248-2015 and Resolution No. 877-2005 authorized planning steps and Procedural Motion No. 5-2016 authorized acquisition of said property; and

WHEREAS, the Town of Southold ("Town") has approved Resolution No. 2016-791 on August 23, 2016 authorizing the acquisition of the subject property in partnership with the County of Suffolk; and

WHEREAS, the Environmental Trust Review Board has reviewed the appraisals and the report of the Internal Appraisal Review Board and has approved the purchase price and authorized the Director of Real Estate and/or his designee to negotiate the acquisition; and

WHEREAS, based upon the Environmental Trust Review Board approved value, an offer to acquire the subject property was made to and accepted by the owner of said property; and

WHEREAS, contracts to acquire said property were prepared by the office of the County Attorney, executed by the owner of the subject property, the Town, and the Director of Real Estate and/or his designee and approved as to legality by the Office of the County Attorney; and

WHEREAS, on November 20, 2007, Suffolk County, as SEQRA Lead Agency, in Resolution 1083-2007, issued a SEQRA negative declaration in connection with the proposed future acquisitions of properties for the preservation of open space for passive park purposes as set forth in Resolution No. 625-2004 – Mastic/Shirley Conservation Area Phase I and Resolutions Nos. 621-2004 and/or 877-2005 – Master Lists I and II Reports, respectively; and

WHEREAS, the following property, 1000-127.00-03.00-009.002, as described in the 1st Resolved, is listed in Resolution No. 625-2004 – Mastic/Shirley Conservation Area Phase I and/or Resolutions Nos. 621-2004 and/or 877-2005 – Master Lists I and/or II Reports, respectively; now, therefore, be it;

RESOLVED, that the County of Suffolk hereby approves the acquisition of the 1st subject property set forth below under the New Suffolk County Drinking Water Protection Program, effective as of December 1, 2007, Open Space component, and the Old Suffolk County Drinking Water 12.5D Program, for a total purchase price of Lot 009.002 total is Lot 017.002 total is 0.67+ acres, which cost is to be shared by the County of Suffolk and the Town, with the County of Suffolk's share, totaling undivided interest; and the for a Town's share, totaling for a undivided interest, subject to a final survey; and hereby authorizes additional expenses, which shall include, but not be limited to. the cost of surveys, appraisals, environmental audits, title reports and insurance, and tax adjustments:

- **2nd RESOLVED**, that the Director of Real Estate and/or his designee, is hereby authorized, empowered, and directed, pursuant to Section C42-3(C)(3) of the SUFFOLK COUNTY CHARTER, to acquire the parcel(s) listed herein above from the reputed owner, the funding for which shall be provided under the New Suffolk County Drinking Water Protection Program, effective as of December 1, 2007, Open Space component, Section C12-2(A)(1) of the SUFFOLK COUNTY CHARTER and under the Old Suffolk County Drinking Water Protection Program, Section C12-5(D) of the SUFFOLK COUNTY CHARTER, as amended and effective as of November 30, 2000,

 , subject to a final survey, said amount representing the County's share of the total purchase price; and, be it further
- **3rd RESOLVED**, that the County Comptroller is hereby authorized to reserve and to pay subject to a final survey, from previously appropriated funds in capital project 525-CAP-8714.211 for the New Suffolk County Drinking Water Protection Program, effective as of December 1, 2007. Open Space component, Section C12-2(A)(1) of the SUFFOLK COUNTY CHARTER and pay subject to a final survey, from previously appropriated funds in MY-176-PLNGBW1 under the Old Drinking Water Protection Program, Section C12-5(D) of the SUFFOLK COUNTY CHARTER, as amended and effective as of November 30, 2000, for this acquisition; and, be it further
- **4**th **RESOLVED**, that the title to this acquisition shall be held by the County of Suffolk and the Town, as tenants-in-common, with the County owning a undivided interest and the Town owning a undivided interest; and, be it further
- **5**th **RESOLVED**, that the Director of Real Estate and/or his designee; the County Planning Department; and the County Department of Public Works are hereby authorized, empowered, and directed to take such actions and to pay such additional expenses as may be necessary and appropriate to consummate such acquisition, including, but not limited to, securing appraisals, title insurance and title reports, obtaining surveys, engineering reports and environmental audits, making tax adjustments and executing such other documents as are required to acquire such County interest in said lands; and, be it further
- **RESOLVED**, that pursuant to Section C12-2(A)(2)(c) this property is not to be developed and Zero (0) Workforce Housing Development Rights, representing the County's percent interest in the total number of development rights allocated to the property, shall be removed and placed in the Suffolk County Workforce Housing Transfer of Development Rights Program registry pursuant to the Workforce Housing Development Rights Program as developed by the Department of Planning, consistent with Resolution No. 412-2005, as amended, and approved by the Suffolk County Executive and the Suffolk County Legislature; and, be it further
- **7th RESOLVED**, that the acquisition of such parcel(s) meets the following criteria as required under Section C12-2(A)(1) of the SUFFOLK COUNTY CHARTER:
 - b). lands within the watershed of the coastal stream, as determined by a reasonable planning or hydrological study; and, be it further

- **8**th **RESOLVED**, that the subject parcel(s) shall be transferred to the County Department of Parks, Recreation and Conservation for passive recreational use; and, be it further
- 9th RESOLVED, that the Director of Real Estate and/or his designee is hereby authorized to negotiate and to enter into any necessary collateral agreements with the Town to effectuate the terms of this resolution; and, be it further
- 10th RESOLVED, if desired, the County of Suffolk, through its Department of Parks, Recreation and Conservation is hereby authorized to negotiate and to enter into a municipal cooperation agreement with the Town for the management of this acquisition, consistent with this program, and the terms and conditions thereof shall be approved by the Suffolk County Attorney in consultation with the respective Commissioner of the County Department of Parks, Recreation and Conservation, who is charged with the management and operation of said property; and, be it further
- 11th RESOLVED, that the above activity is an unlisted action pursuant to the provisions of Title 6 NYCRR, Part 617; and, be it further
- **12**th **RESOLVED**, that the project will not have a significant effect on the environment for the following reasons:
 - 1.) the proposed action will not exceed any of the criteria of 6 NYCRR, Section 617.7, which sets forth thresholds for determining significant effect on the environment, as demonstrated in the Environmental Assessment Form; and
 - 2.) the proposed use of the subject parcel(s) is passive recreation; and
 - 3.) if not acquired, the property will most likely be developed for residential purposes; incurring far greater environmental impact that the proposed acquisition and preservation of the site would have; and, be it further
- 13th RESOLVED, that in accordance with Section 450-5(C)(4) of the SUFFOLK COUNTY CODE, the Suffolk County Council on Environmental Quality is hereby directed to prepare and circulate any appropriate notices or determinations in accordance with this resolution.
- 14th RESOLVED, that this Legislature, being the State Environmental Quality Review Act (SEQRA) lead agency, hereby finds and determines that this resolution constitutes a Type II Action pursuant to 6 NYCRR Sections 617.5(c)(20) and (27) of the New York Code of Rules and Regulations since such actions are simply legislative decisions administering and implementing the acquisition of property for passive park purposes which will mainly result in a beneficial impact and for which SEQRA Determination of Non-Significance has already been issued in Suffolk County Resolution No. 1083-2007

6 NYCRR Part 617

State Environmental Quality Review

Part 2 – Impact Assessment (To be completed by Lead Agency)

		No, or small impact may occur	Moderate to large impact may occur
1.	Will the proposed action create a material conflict with an adopted land use plan or zoning regulations?	\boxtimes	
2.	Will the proposed action result in a change in the use or intensity of use of land?	\boxtimes	
3.	Will the proposed action impair the character or quality of the existing community?	\boxtimes	
4.	Will the proposed action have an impact on the environmental characteristics that caused the establishment of a Critical Environmental Area (CEA)?	\boxtimes	
5.	Will the proposed action result in an adverse change in the existing level of traffic or affect existing infrastructure for mass transit, biking or walkway?		
6.	Will the proposed action cause an increase in the use of energy and fail to incorporate reasonably available energy conservation or renewable energy opportunities?		
7.	Will the proposed action impact existing public/private water supplies?	\boxtimes	
8.	Will the proposed action impact existing public/private wastewater treatment utilities?	\boxtimes	
9.	Will the proposed action impair the character or quality of important historic, archaeological, architectural or aesthetic resources?		
10.	Will the proposed action result in an adverse change to natural resources (e.g., wetlands, waterbodies, groundwater, air quality, flora and fauna)?		
11.	Will the proposed action result in an increase in the potential for erosion, flooding or drainage problems?	\boxtimes	
12.	Will the proposed action create a hazard to environmental resources or human health?	\boxtimes	

SUFFOLK COUNTY SHORT ENVIRONMENTAL ASSESSMENT FORM

6 NYCRR Part 617 State Environmental Quality Review

Part 3 – Determination of Significance

Signature of Responsible Officer in Lead Agency

The Lead Agency is responsible for the completion of Part 3. For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts. Attach additional pages as necessary. Check this box if you have determined, based on the information and analysis above, and any supporting documentation that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required. (Positive Declaration) The check this box if you have determined, based on the information and analysis above, and any supporting documentation that the proposed action will not result in any significant adverse environmental impacts. (Negative Declaration) Name of Lead Agency Date Print or Type Name of Responsible Officer in Lead Agency Title of Responsible Officer

Signature of Preparer (if different from Responsible Officer)

SUFFOLK COUNTY FULL ENVIRONMENTAL ASSESSMENT FORM

6 NYCRR Part 617 State Environmental Quality Review

Part 1 – Environment and Setting

<u>Instructions</u>: Part 1 is to be completed by the applicant or project sponsor. Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information. If a question is not applicable to the proposed project indicate with "N/A".

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

A. Project and Sponsor Information

Residential : Industrial : Recreational : Other : Other

County Center and the preservation of the remaining land.

Is a cluster/conservation layout proposed?

Minimum and maximum proposed lot sizes:

Number of lots proposed:

If Yes:

ii.

Is the proposed action a subdivision, or does it include a subdivision?

i. Purpose or type of subdivision? (if mixed, specify types)

g.	If No, What is the anticipated period of construction? If Yes: Total number of phases anticipated: Master Plan allows for the development of up to 30 to 60 acres of the existing developable land (aprox. 197 acres) at the Yaphank County Center for future County needs and the preservation of the remaining land. Anticipated commencement date of phase I (including demolition): Anticipated completion date of final phase: Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases:						
h.	Does the project include new residential uses? If Yes, show number of units proposed. Single Family Two Family Three Family Multi-Family (4+) Initial Phase At Completion	Yes 🗌 No 🖂					
i.	Does the proposed action include new non-residential construction (including expansions)? While no specific construction is planned the Master Plan does allow for the development of up to 30 to 60 acres of the existing developable land (aprox. 197 acres) at the Yaphank County Center for future County needs and the preservation of the remaining land. If Yes: Total Number of Structures: Dimensions of largest proposed structure: Approximate extent of building space to be heated or cooled:	Yes ⊠ No □					

J. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage? If Yes: Purpose of the impoundment: If a water impoundment, the principal source of the water: Ground Water \[\]; Surface Water Streams \[\]; Other \[\] (specify): If other than water, identify the type of impounded/contained liquids and their source: Approximate size of the proposed impoundment (include units): Volume: Surface area: Dimensions of the proposed dam or impounding structure: Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rockwood, concrete):	Yes □ No ⊠
D.2 Project Operations	
a. Does the proposed action include any excavation, mining or dredging, during construction, operations or both? (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite) If Yes: What is the purpose of the excavation or dredging? How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site? Volume: Over what duration of time: Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them:	Yes □ No ⊠
D.2.a (cont.) – only answer following if checked "Yes" above	
Will there be onsite dewatering or processing of excavated materials? If Yes, describe:	
What is the total area to be dredged or excavated?	
What is the maximum area to be worked at any one time?	
What would be the maximum depth of excavation or dredging?	
Will the excavation require blasting?	
Summarize site reclamation goals and plans:	

Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, water body, shoreline, beach or adjacent area?	
If Yes:	1
Identify the wetland or water body which would be affected (by name, water index number, wetland map number or geographic description):	
Describe how the proposed action would affect that water body or wetland, e.g. excavation, fill, placement of structures or creation of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:	
Will proposed action cause or result in disturbance to bottom sediments? If Yes, describe:	
Will proposed action cause or result in the destruction or removal of aquatic vegetation? If Yes:	Yes 🗌 No 🖂
Area of vegetation proposed to be removed:	
Expected acreage of aquatic vegetation remaining after project completion:	
Purpose of proposed removal (e.g., beach clearing, invasive control, boat access):	
Proposed method of plant removal:	
If chemical/herbicide treatment will be used, specify product(s):	
Describe any proposed reclamation/mitigation following disturbance:	
	1

Will the proposed action use or create a new demand for water?	
While no specific construction is planned the Master Plan does allow for the development of up to	
30 to 60 acres of the existing developable land (aprox. 197 acres) at the Yaphank County Center for	
uture County needs and the preservation of the remaining land.	
uture county needs and the preservation of the remaining land.	
6 3 7	
f Yes:	
Total anticipated water usage/demand per day:	
Will the proposed action obtain water from an existing public water supply?	
If Yes:	
Name of district/service area:	
Name of district/service area:	
Does the existing public water supply have capacity to serve the proposal?	
Yes No	
Is the project site in the existing district?	
Yes No	
Is expansion of the district needed?	
Yes No	
Do existing lines serve the project site?	
Yes No	
Will line extension within an existing district be necessary to supply the project?	Yes 🔀 No 🗌
If Yes:	
Describe extensions or capacity expansions proposed to serve this project:	
Source(s) of supply for the district:	
Source(s) of suppry for the district.	
Is a new water supply district or service area proposed to be formed to serve the project site?	
If Yes:	
Applicant/sponsor for new district:	
Date application submitted or anticipated:	
Proposed source(s) of supply for new district:	
1 Toposcu source(s) of supply for new district.	
If a public water supply will not be used, describe plans to provide water supply for the project:	
The state of the s	
If water supply will be from wells (public or private) what will be the maximum assertion	
If water supply will be from wells (public or private), what will be the maximum pumping	
capacity?	

ature County needs and the preservation of the remaining land.	
Yes: Total anticipated liquid waste generation per day:	,
	1
Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):	
If sanitary wastewater identify proposed disinfection technology and treatment goals for the following:	
Disinfection technology:	
Nitrogen:	
Phosphorus:	
Total Suspended Soilds (TSS):	
Biological Oxygen Demand (BOD):	,
Will the proposed action use any existing public wastewater treatment facilities?	
If Yes:	,
Name of wastewater treatment plant to be used:	,
Name of district:	
Does the existing wastewater treatment plant have capacity to serve the project? Yes No	
Is the project site in the existing district? Yes No	Yes 🖂 No
Is expansion of the district needed? Yes No	
Do existing sewer lines serve the project site? Yes No	
Will line extension within an existing district be necessary to serve the project?	,
If Yes:	
Describe extensions or capacity expansions proposed to serve this project:	
Will a new wastewater (sewage) treatment district be formed to serve the project site?	
If Yes:	,
Applicant/Sponsor for new district:	,
Date application submitted or anticipated:	
What is the receiving water for the wastewater discharge?	
If public facilities will not be used, describe plans to provide wastewater treatment for the	
project, including specifying proposed receiving water (name and classification if surface	
discharge, or describe subsurface disposal plans):	.

e.	Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? While no specific construction is planned the Master Plan does allow for the development of up to 30 to 60 acres of the existing developable land (aprox. 197 acres) at the Yaphank County Center for future County needs and the preservation of the remaining land.	
	If Yes:	
	How much impervious surface will the project create in relation to total size of project parcel?	
	Area of Impervious Surface:	
	Area of Parcel:	
	Describe types of new point sources:	Yes ⊠ No □
	Where will the stormwater runoff be directed (i.e. on-site stormwater management	163 2 110
	facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?	
	If to surface waters, identify receiving water bodies or wetlands:	
	Will stormwater runoff flow to adjacent properties? Yes \sum No \sum	
	Does proposed plan minimize impervious surfaces use pervious materials or collect and re-use stormwater? Yes No	
f.	Does the proposed action include, or will it use on-site, one or more sources of air emissions,	
1.	including fuel combustion, waste incineration, or other processes or operations?	
	If Yes, identify:	
	Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles):	Yes 🗌 No 🖂
	Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers):	
	Stationary sources during operations (e.g., process emissions, large boilers, electric generation):	

gj.	Will any air emission sources named in D.2.f (above) require a NY State Air Registration, Air Facility Permit or Federal Clean Air Act Title IV or Title V Permit? If Yes: Is the project site located in an Air Quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year) Yes \square No \square In addition to emissions as calculated in the application, the project will generate: - Tons/year (metric) of Carbon Dioxide (CO ₂) - Tons/year (metric) of Nitrous Oxide (N ₂ O) - Tons/year (metric) of Perfluorocarbons (PFCs) - Tons/year (metric) of Sulfur Hexafluoride (SF ₆) - Tons/year (metric) of Carbon Dioxide equivalent of Hydroflorocarbons (HFCS) - Tons/year (metric) of Hazardous Air Pollutants (HAPs)	Yes □ No ⊠
h.	Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)? If Yes: Estimate methane generation in tons/year (metric): Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring):	Yes □ No ⊠
i.	Will the proposed action result in the release of air pollutants from open-air operations or processes such as quarry or landfill operations? If Yes, describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):	Yes 🗌 No 🖂

,	Will the proposed action result in a substantial inc substantial new demand for transportation facilities. If Yes: When is the peak traffic expected? (check all that Morning \(\subseteq\); Evening \(\subseteq\); Weekend \(\subseteq\); For commercial activities only, projected number	es or services? It apply) Randomly between the hours of to				
	Parking spaces: Existing: Proposed:	Net Increase/Decrease:				
	Does the proposed action include any shared use Yes No		Yes 🗌 No 🖂			
If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe: Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? Yes No Will the proposed action include access to public transportation or accommodations for use of						
	hybrid, electric or other alternative fueled vehicl Yes No No Will the proposed action include plans for pedes connections to existing pedestrian or bicycle rou Yes No	trian or bicycle accommodations for				
k.	Will the proposed action (for commercial or industrial demand for energy?	strial projects only) generate new or additional				
		ster Plan does allow for the development of up to prox. 197 acres) at the Yaphank County Center for emaining land.				
	If Yes:					
	Estimate annual electricity demand during operation of the proposed action: Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility or other):					
	Will the proposed action require a new, or an up Yes \[\subseteq No \[\subseteq \]	grade to, an existing substation?				
1.	Hours of operation (Answer all items which apply					
	During Construction Monday-Friday:	During Operations Monday-Friday:				
	Saturday:	Saturday:	N/A 🔀			
	Sunday:	Sunday:	11/11			
	Holidays:	Holidays:				
		, , , , , , , , , , , , , , , , , , , ,				

m.	Does the proposed action produce noise that will exceed existing ambient noise levels during construction, operation or both?	
	While no specific construction is planned the Master Plan does allow for the development of up to 30 to 60 acres of the existing developable land (aprox. 197 acres) at the Yaphank County Center for future County needs and the preservation of the remaining land. Construction of this development may result in temporary exceedances of ambient noise levels.	
		Yes 🛛 No 🗌
	If Yes:	
	Provide details including sources, time of day and duration:	
	Will proposed action remove existing natural barriers that could act as a noise barrier or screen? Yes \[\] No \[\] Describe:	
n.	Will the proposed action have outdoor lighting?	
	While no specific construction is planned the Master Plan does allow for the development of up to 30 to 60 acres of the existing developable land (aprox. 197 acres) at the Yaphank County Center for future County needs and the preservation of the remaining land. While new development may have outdoor lighting, the Master Plan recommends that new development be well buffered from the surrounding Yaphank community.	Yes ⊠ No □
	If Yes:	
	Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:	
	Will proposed action remove existing natural barriers that could act as a light barrier or screen?	
	Yes No Describe:	
О.	Does the proposed action have the potential to produce odors for more than one hour per day?	
	If Yes:	
	Describe possible sources, potential frequency and duration of odor emissions and proximity to	Yes ∐ No ⊠
	nearest occupied structures:	
p.	Will the proposed action include any bulk storage of petroleum (over 1,100 gallons) or chemical products (over 550 gallons)?	
	If Yes:	
	Product(s) to be stored:	
		Yes 🗌 No 🖂
	Volume(s): per unit time: (e.g., month, year)	
	Generally describe proposed storage facilities:	

q.	Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation?	
	If Yes:	
	Describe proposed treatment(s):	Yes 🗌 No 🖂
	Will the proposed action use Integrated Pest Management Practices?	
	Yes No	
r.	Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)?	
	While no specific construction is planned the Master Plan does allow for the development of up to 30 to 60 acres of the existing developable land (aprox. 197 acres) at the Yaphank County Center for future County needs and the preservation of the remaining land.	
	If Yes:	
	Describe any solid waste(s) to be generated during construction or operation of the facility:	
	Construction: tons per (unit of time) Operation: tons per (unit of time)	
		Yes 🛛 No 🗌
	Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:	
	Construction:	
	Operation:	
	Proposed disposal methods/facilities for solid waste generated on-site:	
	Construction: Operation:	
	Ореганоп.	
S.	Does the proposed action include construction or modification of a solid waste management facility?	
	If Yes:	
	Type of management or handling of waste proposed for the site (e.g., recycling or transfer	
	station, composting, landfill or other disposal activities): Anticipated rate of disposal/processing:	Yes 🗌 No 🖂
	tons/month, if transfer or other non-combustion/thermal treatment, or	
	tons/hour, if combustion or thermal treatment	
	If landfill, anticipated site life: years	
		1

t.	Will proposed action at the site involve the commercial generation, treatment, storage or disposal of hazardous waste?					
	If Yes:					
	Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility:					
	Generally describe processes or activities involving hazardous wastes or constituents:					
	Specify amount to be handled or generated: tons/month					
	Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents:	Yes □ No ⊠				
	Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? Yes \[\subseteq No \[\subseteq \]					
	If Yes:					
	Provide name and location of facility:					
	If No:					
	Describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:					
u.	Will proposed action adhere to Leadership in Energy and Environmental Design (LEED) or any other green building principals?					
	If Yes:	Yes ⊠ No □				
	Describe proposed green building methods and attempted level of certification, if any: The Plan recommends that new development adhere to the 2016 Suffolk County Energy RFP regarding renewables.	ies 🖂 No 📋				
v.	Does the project sponsor propose the use of energy benchmarking to monitor and adjust project					
	energy needs?					
	V6. V7	Yes □ No ⊠				
	If Yes, explain:					
w.	Will the proposed action use native plants for all landscaping needs?					
	Identify species to be used and method of irrigation:	Yes ☐ No ⊠				
х.	Does the proposed action promote local tourism?					
	If Yes, explain:	Yes ☐ No ⊠

SUFFOLK COUNTY FULL ENVIRONMENTAL ASSESSMENT FORM

6 NYCRR Part 617

State Environmental Quality Review

Part 2 – Identification of Potential Project Impacts

<u>Instructions</u>: Part 2 is to be completed by the lead agency. It is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

Tips for completing Part 2:

	•Rev	iew all of the information p	provided in Pa	rt 1.	
	•Revi	iew any application, maps,	supporting ma	aterials and the	Full EAF
	Workbook.				
	•Ans	wer each of the 18 question	ns in Part 2.		
	•If yo	ou answer "YES" to a num	bered question	n, please compl	ete all the
	questions that follow in that section.		_		
	•If yo	ou answer "NO" to a numb	ered question,	move on to the	e next
	numbered section.				
	•Che	ck appropriate column to in	ndicate the ant	icipated size of	f the impact.
	•Prop	osed projects that would e	xceed a numer	ric threshold co	ontained in a
	question should result in the reviewing agenc				
	•The	reviewer is not expected to	be an expert	in environmen	tal analysis.
	•If yo	ou are not sure or undecide	d about the siz	e of an impact	, it may help
	to review the sub-questions for the general qu	estion and consult the wor	kbook.	•	
	•Whe	en answering a question co	nsider all com	ponents of the	proposed
	activity, that is, the "whole action."			•	•
	•Con	sider the possibility for lon	ng-term and cu	mulative impa	cts as well as
	direct impacts.			•	
	•Ans:	wer the question in a reaso	nable manner	considering the	e scale and
	context of the project.

6 NYCRR Part 617 State Environmental Quality Review

Part 3 – Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination: To complete this section: Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact. Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur. The assessment should take into consideration any design element or project changes. Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact. Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result. Attach additional sheets, as needed.

Yaphank County Center

Comprehensive Master Plan 2016

Yaphank County Center Planning Committee

Established via Resolution 153-16

Yaphank County Center Comprehensive Master Plan

Overview

Since there is no master plan for the Yaphank County Center, and as the future may hold extensive consolidation of facilities into existing and new structures, as well as there being vulnerable natural resources in the County complex, Legislator Kate Browning introduced and the Suffolk County Legislature passed, Resolution 153-2016, Establishing a committee to maximize use of County property in Yaphank, which created a committee to draft a comprehensive master plan for the complex to guide future development. This document was created in response to this directive.

Introduction

Yaphank County Center: Yesterday and Today

The Yaphank County Center (YCC) is within the Town of Brookhaven, which was first incorporated as a town in 1666. Yaphank was first settled in the 1720s, as a farming community. It originally was called Millville due to its cluster of mills along the Connecticut River, now known as the Carmans River. By the turn of the nineteenth century, local roads dotted the area, but the main settlement of the area remained north of the YCC parcels, along the Carmans River and Main Street. The Long Island Railroad, which was completed through the YCC area in the 1840s, allowed the area to grow, as it afforded transportation through Long Island into New York City. In 1845, when applying for a village post office, the name Millville was changed to Yaphank, after the Native American name for the local creek (Bayles 1874, Munsell 1882, Yaphank Historical Society n.d.). The site at mid-nineteenth century contained both the railroad and the cluster of development north of the YCC. At this time, all of the parcels were still used as farmland or woodland.

In 1870, Yaphank was selected as the site for the new Suffolk County Farm and Almshouse. The original farm, which has been determined to be a State and National Register of Historic Places Eligible (S/NRE) Historic District by the NYSOPRHP comprised of 170 acres bounded by Yaphank Avenue on the east, the Long Island Railroad tracks on the south except for a 25 acre parcel south of the LIRR, and Patchogue Road (now Long Island Avenue) on the north. Within this parcel were built the first county almshouse and its associated barn, now listed on the S/NRHP, as well as various ancillary buildings, most of which have been replaced with twentieth-century structures. Residents of the almshouse tended the farm, which was designated as self-supporting. The almshouse is shown on Beers map for 1873, and 1888.

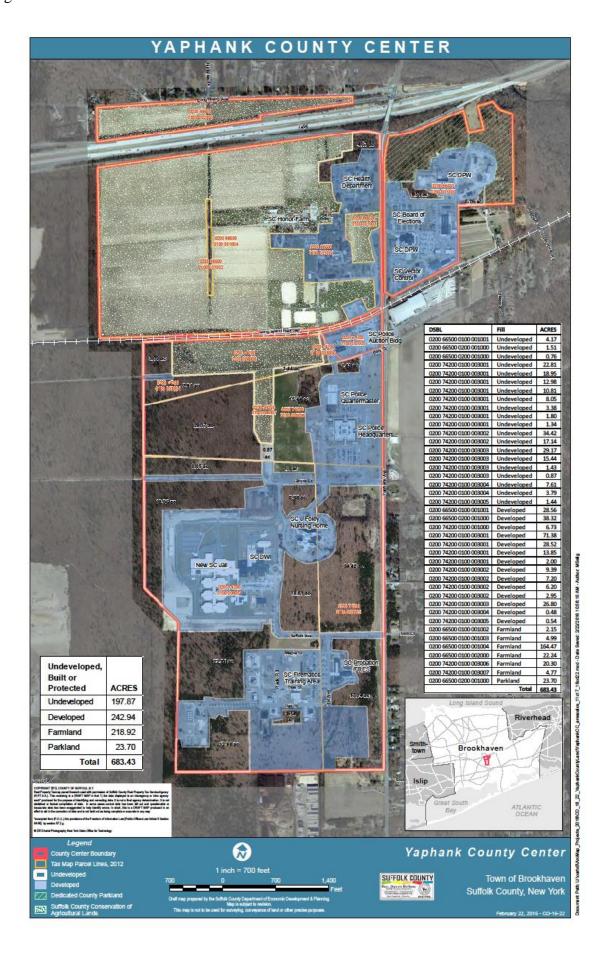

In 1879, additional acreage was purchased for County purposes on the east side of Yaphank Avenue, and a Children's Home was established in an existing farm house just north of the railroad tracks at Yaphank Avenue, so that children could be housed independently of the adult almshouse population (it is labeled as an Orphan Asylum on the 1888 Beers map.. An associated cemetery was created from almshouse and Children's Home residents who died, and was located at the far northeast end of the county holdings, on a terrace above Carmans River. Records for the cemetery, which are available online (Suffolk County Clerk 2010), show that over 1,000 burials, with interments beginning in 1871 and continuing through 1951. The first almshouse was replaced by the Suffolk County Home and Infirmary in 1938, which still stands on farm property and is now used for county offices. At that time, the County Farm acreage had

grown to include about 600 acres (Bayles 1874; Munsell 1882; W.P.A. ca. 1936-1938; Yaphank Historical Society n.d.).

As Suffolk County began to grow in the post-World War II era, the demand for increased municipal sewers also grew. In the 1950's, Suffolk built the present Department of Public Works headquarters complex, and beginning in the 1950's to mid-1960's built a health complex, a police headquarters complex, Vector Control structure for the Mosquito Control Commission, a jail, and other municipal structures to serve a rapidly growing County. Beginning in the mid-1950's, the Yaphank County Complex was envisioned to be the center for municipal services of a County thought to grow to 3 million residents especially as it was geographically near the center of the County. A western municipal complex in Hauppauge was envisioned to serve the growing western town and Riverhead as the County seat would service the southeastern town.

Beginning in the 1970's, the population of the County stabilized and the growth rate slowed dramatically, as environmental and economic constraints emerged. Major municipal development ceased in Yaphank, and the Dennison Building in Hauppauge was developed as the primary executive branch center after the town board form of governance was replaced with a County form of government for many functions. In 2003, the County Farm in Yaphank was officially protected as agricultural land via Resolution 1105-03.

Beginning in 2010, the County entertained the concept of selling off surplus land of the complex. Originally, the County envisioned creation of an entirely new residential and industrial complex based on the western County owned lands, but in 2011 this concept was abandoned and the County passed Resolution 298-11, which declared 247 acres surplus and made this land available for sale or lease. In 2013 the County sold 230 acres of western land to Oakland Transportation Holdings, which wished to establish a rail receiving and marshalling complex and associated industrial complex. In 2015, the County solicited proposals for renewable energy facilities on land to be leased in the complex. One company responded with proposals to build solar arrays on wooded undeveloped portions of the complex.

Yaphank County Center Details

A. General Area Land Use

- **1.** Within approximately 1 mile of the Yaphank County Center Complex there are many different land uses:
 - i. Agricultural -5.7% (primarily to the east)
 - ii. Industrial -9.7% (mostly to the northwest and west)
 - iii. Residential 12% (see notes below)
 - iv. Transportation -9.5% (various roads)
 - v. Waste Management 7.6%
 - vi. Utilities .9%
 - vii. Commercial .9%
 - viii. Community Services 5.6% (The County campus complex)
 - ix. Open Space -18.2%
 - **x.** Vacant -29.9%
- **2.** The Suffolk County land ownership in Yaphank is divided into 2 categories the County Farm and the County campus complex centered on Yaphank Avenue.
 - i. The County Farm consists of 218.92 acres, primarily north of the Long Island Railroad. The County campus complex consists of 197.87 undeveloped acres split into numerous non-contiguous and fragmented parcels, 242.94 developed acres (buildings, parking lots and associated structures such as an STP) spread out over nearly a mile along Yaphank Avenue, and 23.70 acres of dedicated parkland.
 - **ii.** The primary County facilities are a sewage treatment plant, fire training center, a jail complex (new and old), the police headquarters complex, SCDPW, SC Board of Elections, SCDOH, and SC Vector Control.
- **3.** The plan area to the west of Yaphank Ave is outside of the Pine Barrens while the land on the east side of Yaphank Ave. is located in the Compatible Growth Area (CGA). The entire area is near the upper Carmans River.
- **4.** The County campus complex is primarily zoned residential.

B. Water Resources

The Yaphank County Center uses approximately 31 million gallons of water each year. This equates to 85,000 GPD. Water is brought to the Yaphank County Center (YCC) via a sixteen inch diameter main from the northwest of the County property nearest to the Long Island Expressway and Sills Road. There is master meter for the YCC in an underground vault. The sixteen inch main splits into two, twelve inch diameter mains south of the Long Island Railroad crossing. The water mains feed all County buildings at the YCC, and the Mastic Sports Association Soccer Fields, which are leased County property, directly west of the Suffolk County Police Headquarters. All buildings have reduced pressure zone (RPZ) devices installed to

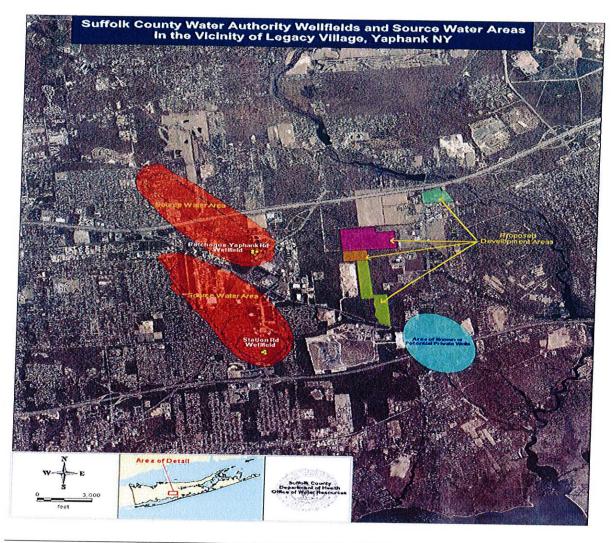

protect the water mains from contamination. Fire hydrants throughout the YCC are fed from these mains as well. Suffolk County currently owns and maintains the fire hydrants on the YCC.

The Suffolk County Water Authority (SCWA) stated in past reports that it would be able to meet a water demand of up to 500,000 GPD utilizing the nearby deep aquifer without significant aquifer drawdown. There is no current YCC expansion proposal that would reach this limit. Existing supply piping would require modification if extensive expansion of the YCC occurs.

The source water area for the existing westerly wells is set forth in the attached map; these areas appear not to have been affected by the pollution plumes identified elsewhere in this plan, as the plumes flow away from the well fields.

Please note that the County campus is next to (east of) the colored areas on the map. As these wells draw from the Magothy aquifer, there is likely little effect upon the Carmans River flow, as that is primarily fed from the upper glacial aquifer.

Generic Environmental Impact Statement Yaphank County Center

C. Groundwater Resources

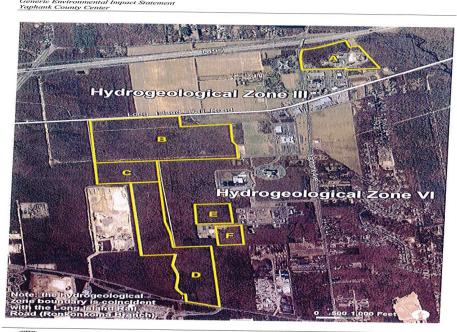

The Yaphank County Campus is located at the divide between hydrogeological zone III and VI. The northern campus is in zone III and the larger southern campus is in zone VI. The divide is assessed to run along the Long Island Railroad tracks (see map). Zone III is a deep flow recharge zone; zone VI is a shallow flow zone into protected areas.

The groundwater flow is easterly from approximately the Long Island Expressway to police headquarters, and southeasterly beginning at approximately the former nursing home. Treated effluent flow from the STP located at the southern part of the campus is southeasterly.

The baseline nitrogen concentration in the Carmans River watershed is at 2mg per liter, also known as the natural background. Treated effluent flows from the county STP southeast in the upper glacial aquifer, and produces nitrogen concentrations of 2-4mg per liter from the mass loading of the plant. This elevated loading appears not to sink into other aquifers, as the mass loading appears only in the 0 to 50 feet level below the water table interface and stays in the upper glacial aquifer. Mapping of nitrogen concentrations at 50-100 feet below the water table shows background levels only, indicating nitrogen is not sinking and is moving in shallow depths.

A higher concentration level of nitrogen seen in the northeast area of the campus is not apparently related to County septic issues, rather it may be coming from the County farm; nitrogen levels here flow east and extend into the 50-100 foot zone at 2-7mg per liter. This may be a legacy of a century of farming.

Base flow within the Carmans River is derived mostly from shallow groundwater; the collecting area is extensive. There may be some Magothy contribution. Nitrogen concentrations are in the 1-2 parts per million range, and the river is markedly less saline than the Patchogue or Swan Rivers.

Cameron Engineering & Associates, LLP

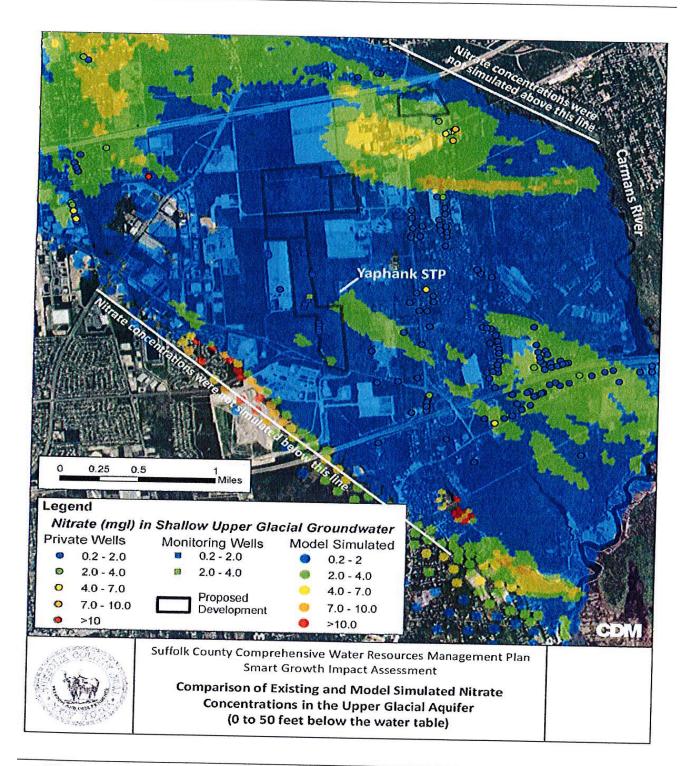

D. Sewage Treatment

The Suffolk County owned Yaphank Sewage Treatment Plant (STP) currently treats approximately 100,000 gallons per day (GPD), equating to 36.5 million gallons per year. All County facilities at the Yaphank County Center (YCC) discharge to the Yaphank STP. When the John J. Foley Skilled Nursing Facility was fully operational, the plant treated approximately 130,000 GPD. The current capacity of the plant is 250,000 GPD but could be expanded up to 1 million GPD. Space has been allocated in the Yaphank Sewer District to accommodate this future expansion. Approximately one acre is needed for every 100,000 GPD of expansion. There is existing modeling of the STP's effluent groundwater plume that was conducted by Camp Dresser & McKee in the 2008/2009/2010 timeframe.

The treatment is tertiary, and offsite concentrations of treated effluent rapidly fade to background levels. The plant is capable of further expansion and treatment levels. Both Brookhaven Rail Terminal and Great Gardens have expressed interest in doing so as well as the Brookhaven landfill. Depending upon the type of wastes discharged, the plant might have to undergo major upgrades to handle the varying waste streams.

The facility is operating efficiently and effectively reduces nitrogen to less than 10 milligrams per liter. The treated effluent flows southeast towards Sunrise Highway. The treated effluent is discharged into the upper glacial aquifer and becomes part of the groundwater flow. As noted elsewhere, this treated effluent stays generally in the upper 0-50 foot depths of the groundwater table, and does not sink below the 50 foot level.

E. Surface Runoff

The land in the Yaphank County campus lies in the glacial outwash plain of Long Island. Consequently, the land is very flat, with several small areas with 10% slopes. As the soils are very porous in the entire area, most rainfall events are rapidly absorbed and there is little runoff from undeveloped lands and little surface runoff transport. Where impermeable surfaces exist, most water is trapped, but there is some runoff, though the runoff does not travel far offsite. There are a number of runoff capture devises in paved areas, and runoff from roofs is not seen as a problem. Yaphank Avenue serves as an eastern boundary and trap for runoff transport.

F. Tree Cover/Vegetation Analysis

There have been 2 environmental impact statements covering major forest sections of the Yaphank County campus complex, one in 2007 and one in 2011 which are typical of the rest of campus forests. Both come to the same conclusions concerning tree and vegetation assemblages.

The subject sites are not broadly diverse in terms of trees. The tree community is considered both successional woodland and part of the Pine Barrens, in that there are characteristics of both classifications. The woodland areas are broadly an oak-pine assemblage/association, containing white oaks (*quercus alba*), pin oaks (*quercus palustris*), scarlet oak (*quercus coccinea*), red oak (*quercus rubra*), and black oak (*quercus velutina*), along with pitch pines (*pinus rigida*), shortleaf pines (*pinus echinata*), and white pines (*pinus strobus*). Curiously, the deciduous oaks predominate in the northern woodland assemblages, with relatively few pines interspersed, in a ratio approaching nearly 60-70%, whereas southern forests are 50%/50% deciduous to coniferous, based upon Spectral Photography/infrared imaging of New York State. In addition, the southern woodlots contain large amounts of white pines.

The relative smaller number of pitch pines than what is usually encountered in pine barren lands is attributed to apparent lack of fires in this area due to fire suppression to protect the County facilities that has prevented pine seedlings from opening and repopulating. The understory of the site, or shrub layer, contains a cover of early low blueberry, late low blueberry, deerberry, and black huckleberry.

According to the New York State National Heritage Program, the woodlands are classified as oak-pitch pine forest. The plant community is ranked G4, G5, and G6, meaning the woods are not rare, and are biologically secure through their range on global and state levels. Property reviews for endangered or threatened plant species was conducted in 2005; no such plants were found, and none were expected. Two endangered species may have once existed in the area, the dwarf hawthorn and slender pinweed, but neither has been seen here since 1907 or 1912.

It should be noted that the pine barrens were cut over and denuded a number of times in the 1800's to supply New York City with firewood, and the Long Island Railroad central line exists in part in the middle of the campus and the rest of the pine barrens precisely to create a transit line for the movement and collection of such cordwood. The woodlands where the County farm now exists were cleared long ago for farmland, as were the lands to the east along Yaphank Avenue, so it is likely that much of the County campus complex also was clear cut for farming in the 1800's, especially as there are very good soils in the campus.

G. Soils

Soils in the County campus complex are mostly prime agricultural soils such as Haven (HaA) and Riverhead sandy loams (RdA), with some Plymouth Carver (PLC) associations. This is unusual in that the larger Yaphank area is generally considered historically to be less productive agriculturally as it sits in the Pine Barrens central core of the Island, which is less productive than the north shore agricultural areas, due to soil sterility and high acid content. This lack of agricultural potential influenced the settlement of the Island, which was mostly settled first in the productive east end, then the north shore, and then the south shore, which contained some marine resources, and only lightly populated along the central spine. Yaphank however was the site of the County poor farm precisely because the soils were productive.

H. Site Pollution

There are a total of 4 pollution events in the Yaphank area that either directly cross/impact the County campus complex or exist near it. They are a perchlorate plume detected in 2000, the Great Gardens metal event detected in 2009, a tetrachloroethene plume detected in 1998, and a TCA event from 1981. The Suffolk County Department of Health has told the Master Plan Committee in 2016 that none of these events will prevent future construction/development of the campus and none present a clear and present danger to the campus.

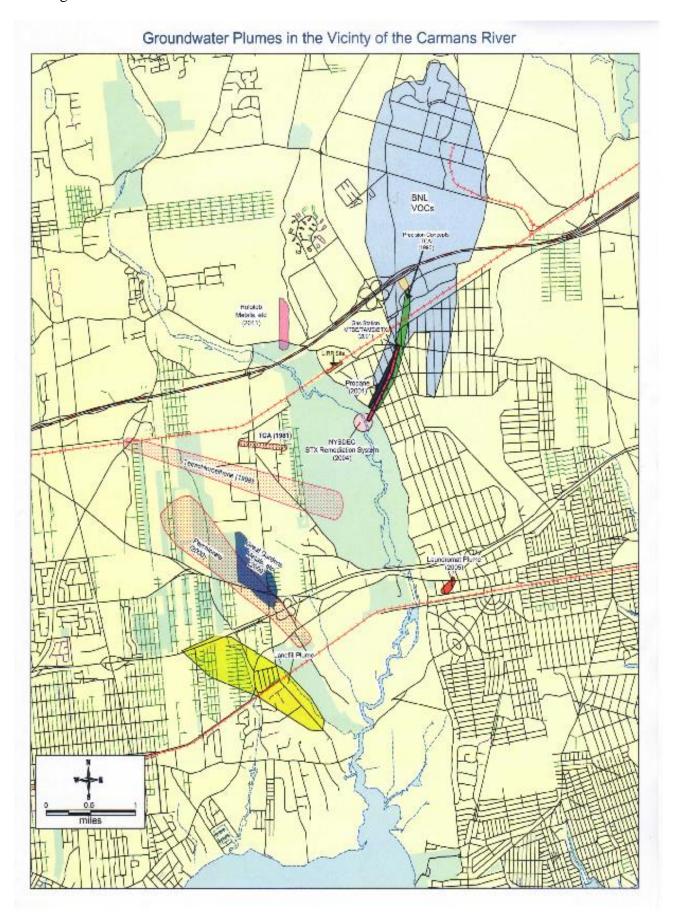

The Perchlorate event produced a plume running southeast from the Grucci firework testing facility, and is derived from fireworks testing. That testing has ceased, and there is no longer any primary danger from this plume. The Perchlorate rides along the upper glacial groundwater.

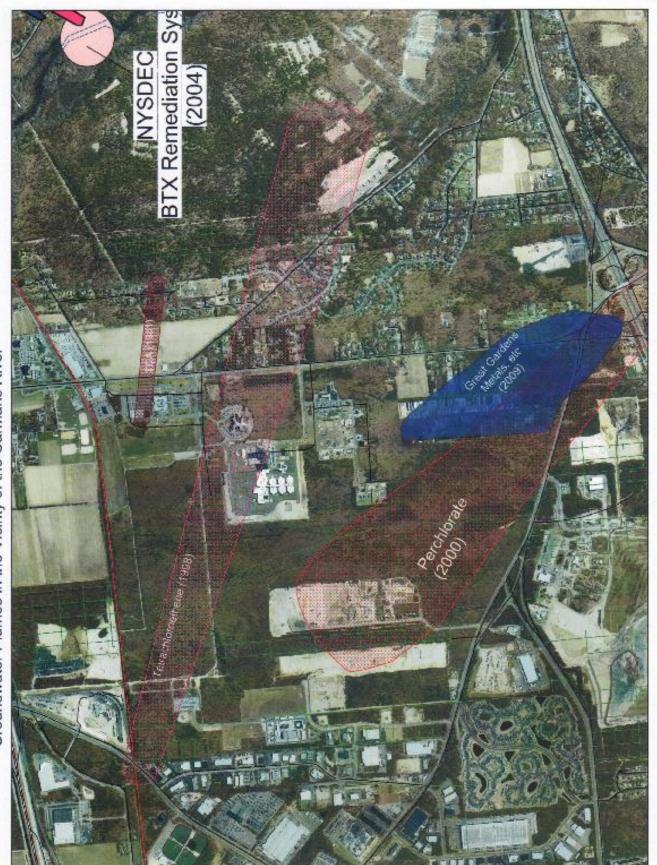

The Great Gardens event is to the south of the campus and runs southeast away from the campus. It apparently was caused by rainwater soaking into a large composting facility, which then acidified as it moved towards the groundwater, which acidification caused naturally occurring magnesium, radium, and iron to become mobile in the soil and move into the groundwater.

The tetrachloroethene plume from 1998 has an unknown cause, but apparently originated to the northwest in an industrial area, and has migrated southeast, entering the campus area near the new jail and the Foley Nursing Center, and then exiting to the east into a residential area. Upon information and belief, those residents now have access to public water. SCDOH has informed the committee that this plume will not prevent later development of the campus.

The TCA plume near the police headquarters effects only a small section of the campus and SCDOH states it is no impediment to later development.

Below are maps showing groundwater plumes in the campus area.

Groundwater Plumes in the Vicinty of the Carmans River

I. Electric

The Yaphank County Center consumes approximately 24.3 million Kilowatt Hours (KWH) of electrical energy each year, net of any existing County owned Yaphank photovoltaic systems in use (40 KW on Police HQ, 100KW on Board Of Elections HQ and 10 KW on DPW HQ). This is an estimated 18% of the entire County usage across all County owned buildings. The YCC is fed from a utility owned electrical substation on the west side of Yaphank Avenue, on the north side of, and adjacent to, the LIRR tracks. Any large scale expansion of the YCC may require some utility upgrades to the substation.

J. Natural Gas

There is currently a natural gas infrastructure within the YCC. A four inch diameter utility owned, high pressure natural gas main runs along Yaphank Avenue from the north feeding all County buildings in the areas including those as the Suffolk County Fire Training Academy. As the Fire Academy is transitioned from using natural gas appliances to live fire training scenarios, the YCC should have ample gas supply from this four inch main for any proposed future construction. Anecdotally, the gas utility has had plans to grid the gas infrastructure from the south connecting the existing Yaphank Avenue gas main but to date no installation has occurred.

Purpose and Process

The purpose of this committee is to investigate and recommend future uses for the remaining Yaphank County Center land that is in the best interest of the County taxpayers. The committee consists of experts in planning and environment, members of the local community, and County staff to determine the best way to utilize the Yaphank Complex over the next 30-50 years. The overall intent of this Comprehensive Master Plan is to provide a guide for the Yaphank County Center where environmental protection is paramount, natural and agricultural resources are conserved, development is guided onto appropriate locations, and water quality is preserved.

The following are critical aspects to this Comprehensive Master Plan:

- Protect the character of the area:
- Protect the Carmans River;
- Utilize green technology and renewable energy on preexisting structures and new constructs;
- Preserve undeveloped land as parkland;
- Preserve the existing campus style layout;
- Determine existing and future County needs/services.
- Preservation of the County Farm.
- Limit all future uses to County purposes and prevent the further sale of surplus land.

Committee Implementation Process

The Committee contacted a number of different County departments, Brookhaven Rail Terminal representatives and the Central Pine Barrens Joint Planning & Policy Commission to gather information as to site conditions, site functions, and future anticipated needs.

- 1. The committee and the Suffolk County Health Department examined earlier studies to provide information about any possible environmental hazards in the area. The Health Department identified 4 groundwater plumes: TCA (1981), Tetrechloroethene (1998), Percholorate (2000), and Great Gardens (2009). The Health Department stated that any future development of the County Center can occur without any further environmental precautions as long as facilities are hooked up to public water. These plumes do not pose any other potential risks to human health.
- 2. The Health Department also reported on the County Sewage Treatment Plant. It currently uses 100k/gpd.-130k/gpd. The current capacity is 250k/gpd, but could be expanded up to 1mil/gpd. The committee is concerned about mass loading and its impact on the Carmans River. While there is land available to expand to 1 million/gpd, the committee recommends abiding by the guidelines that will be set forth by the NYSDEC's Long Island Nitrogen Action Plan (LINAP) to determine the capacity of the STP.
- 3. The Department of Public Works reported on water usage at the County Complex. The Yaphank County Center currently uses 31 million gallons of water per year. The Suffolk County Water Authority stated that it would be able to meet the demands of up to 500,000gpd but there is no proposal in this plan that would reach this limit.
- 4. The committee also discussed future plans for the site with the Suffolk County Department of Public Works' Facilities Engineering Division. These County needs, as of 2016, would require a minimum of 30 acres of land. DPW reported that the area had been recently considered for the following projects in the future:
 - A new laboratory for Suffolk County Vector Control and other departments;
 - A 7 acre expansion of the existing Sewer Treatment Plant;
 - A new Police Headquarters or ancillary police building;
 - A new Farm Center welcome area and educational facility;
 - Expansion of the existing Yaphank County Correctional Center.
 - Expansion of existing FRES Training Facilities
 - Emergency Operations Center Expansion
 - Geothermal Well installation at the Board of Elections
 - DPW Lab and Vector Control Modifications/Additions
- 5. The committee examined the potential future development of County services through an onsite visit to the YCC. The committee toured two areas for possible preservation and development during the field visit.
 - a. The first site is roughly 30 acres directly to the west of the existing soccer fields and police headquarters. The tree growth appears more developed than in the large swath of land to the south and east of the John J. Foley Skilled Nursing Facility. It is far from Yaphank Avenue, so there would be fewer impacts to the surrounding community. However, this would be the last remaining land between

the County campus and the Brookhaven Rail Terminal, which will be undergoing a large expansion in the future.

- b. The second site is an estimated 30 acres located between the John J. Foley Nursing Home and the Suffolk County Fire, Rescue & Emergency Commission (FRES). This undeveloped land seems to be "newer growth" forest. With the appropriate buffer it could be suitable for future County development without impacting the character of the community. There is concern about the air quality in this area because of the adjacent fire training academy. There have been past complaints from existing staff about smoke from the facility.
- c. The committee determined that both forest complexes are valuable resources and should not be the immediate focus of future development, but rather development should first utilize available cleared land within the complex. Any infringement upon forested areas shall be considered later, only after all other disturbed areas have been utilized, and in a way that would retain as much forest as possible.

6. Brookhaven Rail Terminal

The committee met with representatives from Brookhaven Rail Terminal to determine the future expansion and uses of its land to the west. Brookhaven Rail Terminal purchased 230 acres of the YCC land through its parent company from Suffolk County in 2012. Since this is directly adjacent to the YCC, and this is the largest tract of land besides County property in the surrounding area, the committee concluded that the growth of BRT should be considered when determining future development at the YCC.

In total BRT owns an estimated 340 continuous acres in Yaphank. The first 30 acres that were privately purchased are completely built out. In 2015, 1,923 rail cars came through this site. As of July 2016 1,301 have come through. Home Depot is currently the anchor client. Their newest client is "New Steel", which transports rebar. "New Steel" will be constructing a new building when expansion begins on the additional acreage.

The terminal currently brings in two loads per day. One at 11am and another usually after 11pm. BRT recently settled a lawsuit with Brookhaven Town. As part of the agreement they will be conducting an updated EIS and 62 acres of the 230 acres that were acquired from Suffolk County is to be preserved. The preserved land is located on the North and North West portions of the property. BRT also gave Brookhaven Town an easement so the Town can potentially pursue hooking up the landfill to the County STP to bring in leachate.

There are approximately 40 trucks per day that leave or come to the facility. This is over a 10-12 hour period. This has held fairly steady throughout 2016 as stone deliveries decrease during the colder months and soy bean oil does not get transported in the warmer months. While the future rail capacity and truck volume is determined by unknown future uses, we do know that over the next several decades an additional 250 acres can be utilized for rail purposes. This leaves the potential for hundreds of new trucks to come or leave the facility on a daily basis.

The next expansion is on 90 acres of land that was privately acquired and does not encompass the land purchased from Suffolk County. This land will be excavated an additional 53 feet to meet railroad regulations and will come within 30 feet to groundwater. The buffer to the County Farm is proposed to be 75 feet. Under the sale agreement with Suffolk County, BRT obtained a non-exclusive easement on Glover Drive, which is for vehicles and pedestrians. BRT

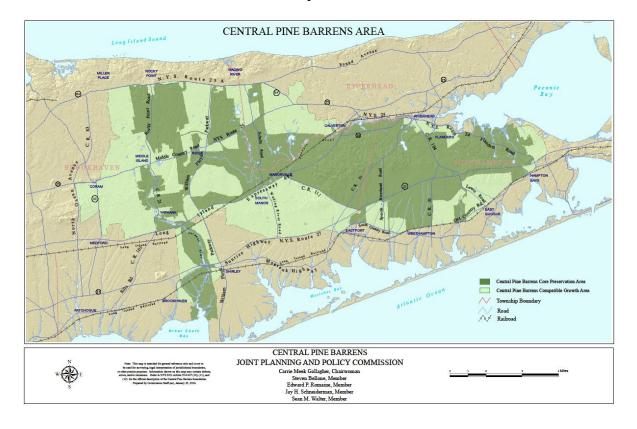

expects to utilize Glover Drive for truck access to Yaphank Ave, and also plans on extending truck access to Horseblock road from the facility. According to the County Attorney's office, the easement gives them the right of passage, but since it is on County property reasonable use regulations are proper. Eventually they have an interest in connecting to the County's STP. The 230 acres won't be expanded onto for another 10 years or longer.

7. Central Pine Barrens Area

The committee met with the Executive Director John Pavacic of the Central Pine Barrens Joint Planning and Policy Commission to determine what areas within the Yaphank County Center are currently designated Central Pine Barrens Area, and to discuss the benefits and consequences of expanding the pine barrens designation in the area.

Currently all of the County land on the east side of Yaphank Ave is within the Compatible Growth Area (CGA) of the Central Pine Barrens. These lands fall under the jurisdiction of the Central Pine Barrens Planning and Policy Commission and must meet the standards set forth under Chapter 5 of the Central Pine Barrens Comprehensive Land Use Plan or a hardship is required.

Lot clearance within the CGA depends on the underlying zoning, which is largely residential at the Yaphank County Center. The Master Plan can be adopted by the Central Pine Barrens Joint Planning and Policy Commission and added to its land use plan. This would allow for development of the County land within the CGA, and the entire Yaphank County Center project site would be considered as a whole. Therefore, lot clearance standards should not restrict the County's ability to develop future County services under this plan, and a CGA designation would reinforce the standards set forth in this plan.

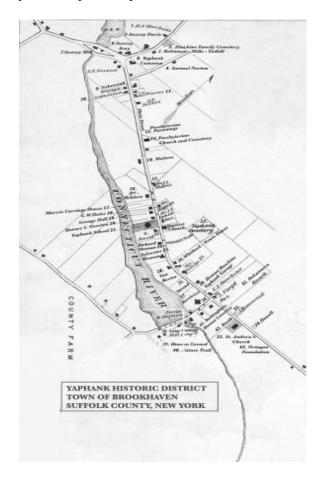

Goals

The committee has identified a number of long-term goals intended to guide development of the Yaphank County Complex by defining and describing the desired results for the area.

Goal 1: Protect the character of the area.

The Yaphank County Center contains part of the Central Long Island Pine Barren region. Therefore, the area has relatively low-density development because of the efforts by the County to protect this precious resource. The Yaphank County Center is a combination of County-owned facilities that maintain a "campus-style" atmosphere with low-height, spread-out buildings. Any future development in the area should continue this trend and adopt a uniform landscaping and architectural design.

The Yaphank County Center is also near the Yaphank Historic District. In 1985 the Yaphank Historic District was established by the Town of Brookhaven. It encompasses 45 homes and structures deemed historically significant to Yaphank, the earliest dating back to 1726, as well as five cemeteries, St Andrews Episcopal Church and the Yaphank Presbyterian Church which recently burned down. The District begins at the corner of Main Street and Yaphank Avenue, County Route 21, north of the Long Island Expressway and runs to Raimond Street. This District includes the Hawkins House, the Police Museum, the Booth House, the Homan House and other historic structures. Any future development or use of the Yaphank County Center land should take this district into consideration in an effort to preserve these unique parts of Suffolk County's history. A map of the historic district is below.

Increased traffic, not only from future County development but also BRT, should be considered in the context of residential areas to the north in the historic district as well as homes along Yaphank Ave. to the east of the County Center. Trucks should be prohibited from accessing Glover Drive as an entrance and exit to Brookhaven Rail Terminal. Although not included within the study area, future actions should not impede or alter use of the County Farm for agricultural purposes.

Goal 2: Protect the Carmans River.

The Carmans River is a 10-mile long river in Brookhaven Town of Suffolk County. The river is one of the fourth longest rivers on Long Island and it is completely fed by groundwater. It is primarily fresh water until it becomes a saltwater estuary for the last two miles entering the Great South Bay. It is a designated New York State Wild, Scenic and Recreational river since 1972. It is also protected by the Central Long Island Pine Barrens. The protection of the Carmans River is of the utmost importance given its connection to Suffolk County's groundwater and estuary ecosystem. Development of the Complex should not harm these resources. Expanding the Compatible Growth Area designation to the entire Yaphank County Center would increase protections for the Carmans River.

Goal 3: Utilize green technology and renewable energy on preexisting structures and new constructs.

Suffolk County has a commitment to green technology and renewable energy. Green technology is technology whose use is intended to mitigate or reverse the effects of human activity on the environment. Renewable energy is energy from a source that is not depleted when used such as wind or solar. Any future development in the Yaphank County Center area will adhere to this commitment in whichever manner is most scientifically and environmentally appropriate at the time of development and design. Adding renewable energy sources to existing infrastructure should be accomplished by constructing on already disturbed properties, most notably parking lots and rooftops. This is consistent with the County's 2016 Energy Request for Proposal (RFP) that makes all County holdings available for renewable energy projects, which stresses that all parking lots and rooftops should be considered first. The combination of green technology and renewable energy represents a dedication to sustainability which is meeting the needs of society in ways that can continue indefinitely into the future without damaging or depleting natural resources (http://www.green-technology.org/what.htm).

Goal 4: Preserve undeveloped land in the complex to the maximum extent possible.

These resources comprise over 197 acres of the remaining undeveloped land within the complex; any development impacting these resources must be carefully assessed and limited to the greatest extent possible. These lands are also seen by the community as open space assets and should be preserved as far as possible. No more than 30-60 acres total in the Complex shall be developed for future County purposes. In addition, no further sale of land should be considered and the repeal of Res. 298-11 would protect any remaining surplus land that has not been sold. Expansion of the CGA within the Yaphank County Center and designating as County parkland any surplus undeveloped land beyond the necessary 60 acres needed for future County needs would further these goals. The Yaphank County Center Comprehensive Master Plan should be adopted by the Central Pine Barrens Joint Planning & Policy Commission.

Goal 5: Preserve the existing campus style layout.

The Yaphank County Center currently maintains a "campus-style" atmosphere. The buildings are low in height and spread apart with foliage between. This plan aims to continue that style for uniformity and residential appeal.

Goal 6: Determine existing and future County needs/services.

The piecemeal development and sale of surplus Yaphank County Center land in the past has highlighted the need for a comprehensive plan that forces Suffolk County to think critically about its future needs. This plan will account for current County needs as well as future needs. This report contains the efforts of the committee to consult with multiple departments in order to collect and combine future County plans into one place to help guide upcoming development in the area. This effort also resulted in suggestions for the amount of land to be developed and to be preserved.

Goal 7: Limit visual impact on the Yaphank community via buffer.

The Yaphank community has expressed the wish to avoid visual impacts of development upon the rural characteristics of the area. Significant buffering along Yaphank Avenue will be required.

Objectives

Objectives translate goals into more tangible and measureable categories. The following objectives are a means for obtaining the previously stated goals. The objectives help to focus and direct efforts because they are more discretely defined. The more focused objectives also allow setting more tightly defined time frames, measureable targets, and benchmarks.

Land Use:

- 1. 30-60 acres of land should be set aside for future known and unknown county needs. The remaining land in the area should be preserved as parkland and strong consideration should be given to expanding the CGA of the Pine Barrens to the entire Yaphank County Center.
 - a. 30-60 acres of land will be reserved for possible future County use as the County deems necessary over the next 30-50 years. This includes the proposed possible projects listed previously as well as any county service or public needs' projects that become necessary in the future. There should be no further sale of this land to private enterprises. In order to protect the environment and to limit the impact on the Suffolk County groundwater the rest of the land will be preserved as undeveloped, open-space. The remaining land should also be strongly considered for reclassification by New York State to be in included in the Compatible Growth Area of the Central Pine Barrens. This is in line with the goal to preserve undeveloped land. Large areas of undeveloped land should not be clear cut; rather forests should be kept intact as far as possible.
- 2. There should be an undeveloped buffer area between the County Complex and Yaphank Avenue to preserve the semi-rural views and protect the character of Yaphank. All new

construction should be set a minimum of 100 feet from Yaphank Avenue. Future opportunities to re-buffer these areas should be pursued.

- a. Any new facilities constructed on the designated 30-60 acres should be set back a minimum of 100 feet from Yaphank Avenue. The undeveloped buffer area between Yaphank Avenue and the facility should remain intact. If a current facility on the Yaphank County Center land is rebuilt, it should be set further back from Yaphank Avenue to adhere to the 100 foot buffer restriction. Local trees and vegetation should be used to fill in the buffer. This helps achieve the goals of preserving undeveloped land while meeting future County needs and protecting the character of the area.
- 3. There should be an undeveloped buffer area between the County Complex and the Brookhaven Rail Terminal (BRT). All new construction should be set a minimum of 100 feet from the border with BRT. Future opportunities to rebuffer should be pursued.
 - a. Any new facilities constructed on the designated 30-60 acres should have a minimum of 100 foot buffer area from the Brookhaven Rail Terminal. The undeveloped buffer area between BRT and the facility should remain intact. If a current facility on the Yaphank County Center land is rebuilt, it should be set further from BRT to adhere to the 100 foot buffer restriction. Local trees and vegetation should be used to fill in the buffer. This helps achieve the goals of preserving undeveloped land, determining future County needs, and protecting the character of the area.
 - b. BRT's proposed buffer to the County Farm and Education Center is not sufficient and could negatively impact the farm's programs and character of the farm. Suffolk County should make every effort to increase the buffer to at least 100 feet.
- 4. If development of available land within the Yaphank County Complex is being considered, priority should be given to already disturbed properties, re-buffering, and revegetation.
 - a. As land within the Yaphank County Center becomes available all options should be considered before a selection is made for the area. All new facilities or plans must be in compliance with the Yaphank County Center Comprehensive Master Plan. This satisfies the goal of determining existing and future County needs.

Building Design:

- 1. Buildings constructed on the Yaphank County Center land should not exceed 3 stories or approximately 35 feet or the lesser of the two.
 - a. In order to fulfill the goal of a "campus-style" design, all buildings that are built or renovated in the Yaphank County Complex should not exceed 3 stories or 35 feet. This shall not include renewable energy uses, HVAC equipment, or public safety accessories. This is in line with the goal to adhere to a "campus-style" design throughout the complex.
- 2. Building placement should adhere to a campus-style design.
 - a. All buildings that are built or refurbished should be placed a minimum of 100 feet away from all other surrounding buildings. The buildings should be connected to one another by foliage-lined walkways and the buffer space between buildings

should be left undeveloped or revegetated as necessary. The walkways should have benches and lighting. This helps achieve the goal to foster a "campus-style" atmosphere at the Yaphank County Complex.

- 3. Newly constructed buildings should connect to the sewer treatment plant.
 - a. These should comply with the Long Island Nitrogen Action Plan (LINAP) and limit mass loading with recommendations from the Suffolk County Health Department. This satisfies the goal of protecting the Carmans River by limiting contamination to the groundwater.

Parking:

- 1. Newly constructed buildings should reduce the amount of paved surface parking lots by utilizing existing lots in the County Complex for dual purposes.
 - a. In order to preserve undeveloped land and protect Suffolk County's groundwater while allowing for recharge; any new buildings constructed should utilize existing parking lots in the area. These parking lots are currently not operating at max capacity and it would be a waste of undeveloped land to fell trees to create unnecessary parking.
- 2. All parking lots that are constructed should be built using permeable parking surfaces.
 - a. If there is no way that a new building can share parking space with another building then newly constructed parking lots should use permeable parking surfaces to allow for rainwater run-off to replenish the groundwater supply. This will protect the Carmans River.

Renewable Energy:

- 1. Where possible, all new and refurbished buildings should incorporate renewable energy. Renewable energy should be focused first and foremost on rooftops and parking lots.
 - a. If already developed land options are impossible, then only designated land allotted for future County development shall be available for renewable energy in 5 acre increments to maintain the campus feel of the Yaphank County Complex. These renewable energy projects should then be relocated to the roofs of any future development on those 5 acre increments. This will preserve undeveloped land and maintain the "campus-style" design of the Yaphank County Center complex.
 - b. Any development in the Yaphank County Complex should also adhere to the guidelines set forth in the 2016 Suffolk County Energy RFP regarding renewables.

Environmental Protection:

1. All remaining undeveloped land that has been identified as surplus or not needed for future County needs is to be preserved as County parkland, and the Compatible Growth Area of the Central Pine Barrens should be considered for expansion to include the entire Yaphank County Center. The County should also push to have the Yaphank County Center Master Plan adopted by the Central Pine Barrens Joint Planning & Policy Commission.

- 2. As set forth in the Suffolk Planning Commission's Green Methodologies Report, "green methodologies" guidelines should be used to manage storm water runoff.
 - a. These include any new scientific or environmental methodologies developed in the future.
- 3. No new water supply wells should be drilled on the Yaphank County Center land.
 - a. Existing water infrastructure can handle future needs.
- 4. All soil must stay on site during construction.
 - a. Farming soils are to be given the highest priority for preservation.
- 5. There should be no sand mining on the Yaphank County Center land.
- 6. Low-water usage, native plants should be incorporated into any new design or rebuffering.
 - a. To create and protect undeveloped land for the future low-water usage, native plants should be used in design whenever possible. This will preserve the character of the Central Long Island Pine Barrens region by eliminating invasive plant species. It will also maintain the character of the Yaphank area. Low-water usage plants will also protect Suffolk County's groundwater by allowing rainwater run-off to replenish the water supply.
- 6. "Dark-Sky" guidelines should be followed to limit light pollution.
 - a. Any new outdoor lighting in the area should:
 - i. Only be on when needed;
 - ii. Only light the area that needs it;
 - iii. Be no brighter than necessary;
 - iv. Minimize blue light emissions;
 - v. Be fully shielded (pointing downward).

Traffic:

- 1. Traffic mitigation will be needed as the Yaphank County Complex and the Brookhaven Rail Terminal (BRT) expand.
 - a. As new facilities are developed Suffolk County should investigate traffic patterns and make any necessary changes to promote safety and efficiency while complying with the overall vision of the Yaphank County Center Comprehensive Master Plan.
 - b. The issue of heavy truck traffic on Glover Drive needs to be thoroughly examined due to potential impacts upon the Yaphank community and the road network. Serious concerns about current conditions are already adversely impacting the community and existing infrastructure. Access to Horseblock Road directly through the BRT facility is critical to preventing negative impacts to residences to the north and east. Suffolk County should work with BRT to divert trucks from already congested and dangerous roadways to more industrial areas to the south. BRT could potentially become an arterial truck route that will allow for restrictions on Yaphank Ave.

STANDARDS OF REVIEW

Any proposed project must meet to the greatest extent possible the planning goals of this master plan. The plan therefore has identified both direct impacts, defined as impacts solely inside or directly relating to the complex and the proposed development, and indirect impacts, defined as impacts from interior development that have an impact outside of the complex or that naturally flow from development, which shall form the standard of review for any future actions. These standards are meant to be looked at as the master planning guidance for the plan, and are exclusive of any SEQRA review, though many SEQRA issues are imbedded within the goals and standards; the planning process and SEQRA are to be viewed as complementary yet separate.

Direct Impact Review

Setbacks: Is the proposed development set back from Yaphank Avenue and the County Farm complex so as to preserve the rural view sheds and characteristics of Yaphank? Are there sufficient buffers? Is the buffer vegetated? Are there plans to replace the vegetation to recreate a wooded buffer?

Trees: As the existing forested areas of the complex are to be preserved to the maximum extent possible and are only to be cleared if no other option remains. Have already cleared areas, underutilized land, or underutilized parking areas been considered first for development and ruled out? Will the existing forest blocs be preserved to the maximum extent possible? Is the development for the sole purpose of expanding County services and meeting unmet County needs? Will development in forested areas be limited to non-contiguous blocks of maximum 5 acres?

Limits on development: The maximum new development of land shall be limited to between 30 and 60 acres in total, leaving 137 or more acres never to be developed and eventually to be placed in park status. In addition, new development should be limited to individual 5 acre parcels spread out in a campus style development pattern. Does the development fit within the limit of growth? Will development conform to the 5 acre pattern?

Architectural style: The campus is to be developed as a spread out low rise campus with a certain unity, similar to the north complex in Hauppauge. Building heights shall be generally limited to 3 stories except for public safety purposes. Does the proposed development conform to this pattern? Is there an architectural unity in placement, if not design?

Green technology/Renewable energy: Is green/renewable energy technology planned as part of any new development or reconstruction to the greatest extent possible? If not new development, do renewable energy projects focus on already improved parcels while preserving forested land?

Parking: Will a project reduce parking needs as far as possible or land bank spaces until proven need exists? Will existing lots be used? Will the new parking areas be available or be designed for dual use?

Land preservation: The 137 or more acres that shall not be developed will be placed in a park preservation category that precludes development, and will be unavailable for development. Is the proposed project such that it only can be placed within previously developed land? If the CGA encompasses this area, does it meet CGA land use standards? Will development occur only in the reserved 30-60 acre component?

Indirect Impact Review

Carmans River: Will the development impact the Carmans? Such impacts shall be limited to the maximum extent possible or precluded if impacts are assessed as severe.

Groundwater: As the complex sits in the groundwater recharge contributing area of the Carmans River, disturbance of groundwater flow is dangerous. Will development disturb the groundwater flow? Can disturbance be mitigated? Will the project connect to the Yaphank sewage treatment plant?

Area Character: Will the development impact the rural low density visual character of the area? Can such impact be mitigated/reduced? Extensive impacts will be precluded, per plan goals.

Traffic: Has the development been planned to minimize potential traffic impacts? Specifically, the plan goal is to minimize traffic impact on the local road network, so have road improvements been considered as a priority action? Will access by trucks to Glover Drive be prohibited?

Conclusion

The Yaphank County Center Planning Committee concludes that the goals of the committee as set out by Resolution 153-16 have been successfully achieved. The committee recommends that the Yaphank County Center Comprehensive Master Plan be formally adopted to ensure its goals and standards are met.

COUNTY OF SUFFOLK

DEPARTMENT OF ECONOMIC DEVELOPMENT AND PLANNING
DIVISION OF PLANNING AND ENVIRONMENT
COUNCIL ON ENVIRONMENTAL QUALITY

GLORIA RUSSO CHAIRPERSON CEQ

MEMORANDUM

RE:

Proposed Acquisition of Land Under the New Suffolk County Drinking Water Protection

Program - Open Space Component and the Old Suffolk County Drinking Water

Protection Program - Brushes Creek Addition - For the Capital Asset Retirement Fund,

LLC and Tristate Capital Holdings, LLC Property, Town of Southold

At its November 16, 2016 meeting, the CEQ reviewed the above referenced matter. Pursuant to Chapter 450 of the Suffolk County Code, and based on the information received, as well as that given in a presentation by Lauretta Fischer, Chief Environmental Analyst with the Suffolk County Department of Economic Development and Planning, the Council advises the Suffolk County Legislature and County Executive, in CEQ Resolution No. 51-2016, a copy of which is attached, that the proposed project be considered an Unlisted Action under SEQRA that will not have significant adverse impacts on the environment.

If the Legislature concurs with the Council on Environmental Quality's recommendation that the project will not have a significant adverse impact on the environment, the Presiding Officer should cause to be brought before the Legislature for a vote, a resolution determining that the proposed action is an Unlisted Action pursuant to SEQRA that will not have significant adverse impacts on the environment (negative declaration). However, if the Legislature has further environmental concerns regarding this project and needs additional information, the Presiding Officer should remand the case back to the initiating unit for the necessary changes to the project and EAF or submit a resolution authorizing the initiating unit to prepare a draft environmental impact statement (positive declaration).

Enclosed for your information is a copy of CEQ Resolution No. 51-2016 which sets forth the Council's recommendations. The project EAF and supporting documentation can be viewed online at http://www.suffolkcountyny.gov/Departments/Planning/Boards/CouncilonEnvironmentalQuality.

cc: All Suffolk County Legislators

Jason A. Richberg, Clerk of Legislature

George Nolan, Attorney for the Legislature

Sarah Lansdale, Director of Planning, Department of Economic Development and Planning

Andrew Freleng, Chief Planner, Department of Economic Development and Planning

Dennis Brown, Suffolk County Attorney

CEQ RESOLUTION NO. 51-2016, RECOMMENDATION CONCERNING A SEQRA CLASSIFICATION AND DETERMINATION FOR THE PURPOSES OF CHAPTER 450 OF THE SUFFOLK COUNTY CODE FOR THE PROPOSED ACQUISITION OF LAND UNDER THE NEW SUFFOLK COUNTY DRINKING WATER PROTECTION PROGRAM — OPEN SPACE COMPONENT AND THE OLD SUFFOLK COUNTY DRINKING WATER PROTECTION PROGRAM — BRUSHES CREEK ADDITION — FOR THE CAPITAL ASSET RETIREMENT FUND, LLC AND TRISTATE CAPITAL HOLDINGS, LLC PROPERTY, TOWN OF SOUTHOLD

WHEREAS, at its November 16, 2016 meeting, the Suffolk County Council on Environmental Quality (CEQ) reviewed the EAF and associated information submitted by the Suffolk County Department of Economic Development and Planning; and

WHEREAS, a presentation regarding the project was given at the meeting by Lauretta Fischer, Chief Environmental Analyst, with the Suffolk County Department of Economic Development and Planning; and

WHEREAS, the project involves the acquisition of 0.67 acre parcel, identified by Suffolk County Tax Map number 1000-127.00-08.00-017.002, to be dedicated to the Suffolk County Parks Department in order to assure it remain in open space for passive recreational use; and

WHEREAS, the 0.67 acre parcel is part of an assemblage of six parcels being acquired as part of the overall 25.87 acre Brushes Creek acquisition; and

WHEREAS, the other five parcels are Master List parcels for which Suffolk County has previously issued a SEQRA Negative Declaration in connection with the parcels' future acquisition for open space purposes; now, therefore, be it

- 1st RESOLVED, that based on the information received and presented, a quorum of the CEQ hereby recommends to the Suffolk County Legislature and County Executive that the proposed activity be classified as an Unlisted Action under the provisions of Title 6 NYCRR Part 617 and Chapter 450 of the Suffolk County Code; and, be it further
- **2nd RESOLVED,** that based on the information received, a quorum of the CEQ recommends to the Suffolk County Legislature and County Executive, pursuant to Title 6 NYCRR Part 617 and Chapter 450 of the Suffolk County Code, that the proposed project will not have significant adverse impacts on the environment for the following reasons:
 - 1. The proposed action will not exceed any of the criteria of 6 NYCRR, Section 617.7, which sets forth thresholds for determining significant effect on the environment, as demonstrated in the Environmental Assessment Form;
 - 2. The proposed use of the subject parcel(s) is passive recreation;
 - 3. If not acquired, the property will most likely be developed for residential purposes; incurring far greater environmental impact than the proposed acquisition and preservation of the site would have;

and, be it further

3rd RESOLVED, that it is the recommendation of the Council that the Legislature and County Executive adopt a SEQRA determination of non-significance (negative declaration).

RE:

CEQ Review of the Recommended SEQRA Classifications of Legislative Resolutions

Laid on the Table November 9, 2016

At its November 16, 2016 meeting, the CEQ reviewed the above referenced matter. Pursuant to Chapter 450 of the Suffolk County Code, and based on the information received, the Council recommends to the Suffolk County Legislature and County Executive in CEQ Resolution No. 52-2016, a copy of which is attached, that the enclosed list of legislative resolutions laid on the table November 9, 2016, be classified pursuant to SEQRA as so indicated in the left hand margin. The majority of the proposed resolutions are Type II actions pursuant to the appropriate section of Title 6 NYCRR Part 617.5, with no further environmental review necessary. Unlisted and Type I actions require that the initiating unit of County government prepare an Environmental Assessment Form (EAF) or other SEQRA documentation and submit it to the CEQ for further SEQRA review and recommendations.

Enclosed for your information is a copy of CEQ Resolution No. 52-2016 setting forth the Council's recommendations along with the associated lists of legislative resolutions. If the Council can be of further help in this matter, please let us know.

COUNTY OF SUFFOLK

DEPARTMENT OF ECONOMIC DEVELOPMENT AND PLANNING DIVISION OF PLANNING AND ENVIRONMENT

COUNCIL ON ENVIRONMENTAL QUALITY

Gloria Russo Chairperson CEO

MEMORANDUM

TO:

Honorable Steven Bellone, Suffolk County Executive Honorable DuWayne Gregory, Presiding Officer

FROM:

Michael Kaufman, Vice Chair

DATE:

November 29, 2016

RE:

CEQ Review of the Proposed Adoption of Suffolk County Resolution, "Accepting the

Comprehensive Master Plan for the Yaphank County Complex", Town of Brookhaven

At its November 16, 2016 meeting, the CEQ reviewed the above referenced matter. Pursuant to Chapter 450 of the Suffolk County Code, and based on the information received, as well as that given in a presentation by Josh Slaughter, Legislative Aide to Suffolk County Legislator Kate Browning, District 3 the Council advises the Suffolk County Legislature and County Executive, in CEQ Resolution No. 53-2016, a copy of which is attached, that the proposed project be considered a Type I Action under SEQRA that will not have significant adverse impacts on the environment.

If the Legislature concurs with the Council on Environmental Quality's recommendation that the project will not have a significant adverse impact on the environment, the Presiding Officer should cause to be brought before the Legislature for a vote, a resolution determining that the proposed action is a Type I Action pursuant to SEQRA that will not have significant adverse impacts on the environment (negative declaration). However, if the Legislature has further environmental concerns regarding this project and needs additional information, the Presiding Officer should remand the case back to the initiating unit for the necessary changes to the project and EAF or submit a resolution authorizing the initiating unit to prepare a draft environmental impact statement (positive declaration).

Enclosed for your information is a copy of CEQ Resolution No. 53-2016 Which sets forth the Council's recommendations. The project EAF and supporting documentation can be viewed online at http://www.suffolkcountyny.gov/Departments/Planning/Boards/CouncilonEnvironmentalQuality If the Council can be of further help in this matter, please let us know.

CEQ RESOLUTION NO. 53-2016, RECOMMENDATION CONCERNING A SEQRA CLASSIFICATION AND DETERMINATION FOR THE PURPOSES OF CHAPTER 450 OF THE SUFFOLK COUNTY CODE FOR THE PROPOSED ADOPTION OF SUFFOLK COUNTY RESOLUTION, "ACCEPTING THE COMPREHENSIVE MASTER PLAN FOR THE YAPHANK COUNTY COMPLEX," TOWN OF BROOKHAVEN

WHEREAS, at its November 16, 2016 meeting, the Suffolk County Council on Environmental Quality (CEQ) reviewed the EAF and associated information submitted by the Suffolk County Legislature; and

WHEREAS, a presentation regarding the project was given at the meeting by Josh Slaughter, Chief of Staff to Suffolk County Legislator Kate Browning, District 3; and

WHEREAS, the proposed action involves the adoption of a Legislative Resolution to accept the Comprehensive Master Plan for the Yaphank County Complex which was prepared by the Yaphank County Center Planning Committee; and

WHEREAS, the Comprehensive Master Plan for the Yaphank County Complex is a land use plan that was developed to provide a long term development guide for the Yaphank County Complex; and

WHEREAS, the Comprehensive Master Plan for the Yaphank County Complex allows for the development of up to 30 to a maximum of 60 acres of the existing developable land (aprox. 197 acres) at the Yaphank County center for future County needs and the preservation of the remaining land; and

WHEREAS, the Master Plan does not designate where the development areas should be located but does includes development guidelines to fulfill the goals of maintaining a "campus-style" design for the Yaphank County Complex, protecting the Complex's natural resources and protecting the character of the surrounding community; now, therefore, be it

1st RESOLVED, that based on the information received and presented, a quorum of the CEQ hereby recommends to the Suffolk County Legislature and County Executive that the proposed activity be classified as a Type I Action under the provisions of Title 6 NYCRR Part 617 and Chapter 450 of the Suffolk County Code; and, be it further

2nd RESOLVED, that based on the information received, a quorum of the CEQ recommends to the Suffolk County Legislature and County Executive, pursuant to Title 6 NYCRR Part 617 and Chapter 450 of the Suffolk County Code, that the proposed project will not have significant adverse impacts on the environment for the following reasons:

- 1. The proposed action will not exceed any of the criteria in Section 617.7 of Title 6 NYCRR which sets forth thresholds for determining significant effect on the environment as demonstrated in the Environmental Assessment Form;
- 2. The proposal does not appear to significantly threaten any unique or highly valuable environmental or cultural resources as identified in or regulated by

- the Environmental Conservation Law of the State of New York or the Suffolk County Charter and Code;
- 3. All future development at the Yaphank County Center will continue to require all applicable Suffolk County permits and approvals;
- 4. The proposed action provides a long term guide for the development of the Yaphank County Complex which includes the preservation of the majority of currently developable land as well as development guidelines which are intended to maintain the "campus style" design for the Yaphank County Complex, protect the Complex's natural resources and protect the character of the surrounding community;

and, be it further

3rd RESOLVED, that it is the recommendation of the Council that the Legislature and County Executive adopt a SEQRA determination of non-significance (negative declaration).
